

# How to Use Index Feature of News-Letter

In order to aid in catching the items that concern you and to facilitate clipping and filing, a key word in small capitals has been printed on the right of the line above each article. The key words used fit into any system of classification, whether it be a straight alphabetical file, a system of your own devising, the Library of Congress classification or the Dewey system.

Note that you can clip out any article without fear of damaging another article in which you might be interested, since editorial matter printed on the righthand pages is backed by advertising, standing matter or a continuation of the article on the other side.

## Library of Congress Classification

The classification of the Library of Congress has come into common use in the libraries of the country owing to the publication of the Government of the card index of all new books. We print below a list of the subject titles which are most used in the SCIENCE NEWS-LETTER. The full scheme of classification is contained in "Outline Scheme of Classes," issued by the Library of Congress.

## The Problem of Translation—

☉Science, probing the unknown universe, writes its findings in cryptic language. A stellar galaxy shining faintly in the heavens hides its splendor and its immensity in numbers and formulæ; a minute germ has thrust upon it a long Latin name. With the aid of such scientific shorthand and such technicalities, science pushes on to new discoveries and new heights.

☉Yet the facts and the methods of science must penetrate and permeate the whole fabric of civilization if the world is to become an increasingly better place to live in. The man in the street, the child in the school, the merchant in the counting house, the judge on the bench, the priest in the temple, all of those who make the world, must know, appreciate, understand and cherish the spirit of research and the power of thought.

☉To *translate* and *interpret* science—that is the function of SCIENCE SERVICE. The thrill and wonder of science reaches two million and a half newspaper readers through SCIENCE SERVICE news dispatches daily. Millions more read SCIENCE SERVICE'S other newspaper articles, its magazine articles and its books.

☉And now its *Science News-Letter* is established to serve the individual, the school and the library.

(The subscription price of the *Science News-Letter* is \$5.00 a year, 10c a week. For ten or more subscriptions sent to the same address the price is 6c a week.)

## Timely Textbooks

THE WEEKLY SCIENCE NEWS-LETTER is received each week with zest—is looked forward to with interest by the student. The compact, handy form of this small magazine makes it easy to use—it takes up but small space and has many advantages over the bound book. It is illustrated with the doings of men of science TO-DAY—their achievements greet the eye but very shortly after the papers have broadcast their latest discoveries and inventions. Accomplishments that make for world history—that will change many lives and occupations are given to your students months and even years before the interesting facts are printed in book form.

The NEWS-LETTER may be ordered in multiple copies. The regular price of 10 cents per copy (\$5.00 per year) is reduced to 6 cents a copy if ten or more are sent to one address. Orders received between now and January 1—to last until the end of the school year (July 1)—will be \$1.50 (in quantities of 10 or over).
