

PHOTOGRAPHS OF SCIENTISTS

Science Service has a collection of nearly 2,000 photographs of scientists throughout the world. The eleventh installment of this list is published below. Although this list has been checked with care, corrections are requested, since a complete catalog will be issued later. Photographs of scientists not listed are desired.

For the convenience of teachers and scientific enthusiasts, these photographs are offered for sale. Any ten photographs (each postcard size $3\frac{1}{8} \times 5\frac{3}{8}$ inches) will be sent postpaid for only \$2.00. Enlargements, 8 x 10 inches, are \$1.00 each postpaid. Postcard pictures are finished only in black and white, but enlargements are offered either in black and white or sepia on buff stock. Please specify which.

Starred (*) photographs can be furnished as \$1.00 enlargements only. Photographs at these prices are sold with the understanding that they are not to be used for publication.

How to Use Key-Word Feature of News-Letter

In order to aid in catching the items that concern you and to facilitate clipping and filing, a key word in small capitals has been printed on the right of the line above each article. The key words used fit into any system of classification, whether it be a straight alphabetical file, a system of your own devising, the Library of Congress classification or the Dewey system.

Note that you can slip out any article without fear of damaging another article in which you might be interested, since editorial matter printed on the right-hand pages is backed by advertising, standing matter or a continuation of the article on the other side.

Library of Congress Classification

The classification of the Library of Congress has come into common use in the libraries of the country owing to the publication of the Government of the card index of all new books. We print below a list of the subject tiles which are most used in the SCIENCE NEWS-LETTER... The full scheme of classification is contained in "Outline Scheme of Classes," issued by the Library of Congress.

DEMAND

Timely Textbooks

THE WEEKLY SCIENCE NEWS-LETTER is received each week with zest—is looked forward to with interest by the student. The compact, handy form of this small magazine makes it easy to use—it takes up but small space and has many advantages over the bound book. It is illustrated with the doings of men of science TO-DAY—their achievements greet the eye but very shortly after the papers have broadcast their latest discoveries and inventions. Accomplishments that make for world history—that will change many lives and occupations are given to your students months and even years before the interesting facts are printed in book form.

The NEWS-LETTER may be ordered in multiple copies. The regular price of 10 cents per copy (\$5.00 per year) is reduced to 6 cents a copy if ten or more are sent to one address.
