

THE ROMANCE OF MODERN MEDICINE

THERE is scarcely another field of modern science which has shown such amazing advances as medicine.

How many times have you read in the News-Letter of these advances? And how often have you asked yourself "what is back of it all?" "What men and events make this possible?"

You will find the answer to your questions in the three books described below—answers which are brief, but written with real spirit and charm. Of course, too, with authority.

These are companionable books—as well as inspiring and useful. It might well be said of all, as *The American Journal of Obstetrics and Gynecology* says of MEDICINE:

"Seelig has presented us with a most charming and readable outline of the history of medicine. Any one whose interest in the history of medicine fails to be permanently aroused by this lifelike resurrection of past epochs may be classified as hopeless. Even the most blasé and matter of fact medical student . . . may be stirred. The book is a real achievement in that it elevates a subject which can be presented in a cut and dried manner, into the absorbing and gripping present."

Medicine—An Historical Outline.....\$3.00
By MAJOR G. SEELIG, M.D.

A brief and spirited introduction to the history of medicine, its rise in all countries and its development into a major science. Just the book to give the physician and lay reader the necessary background to understand medical advance.

Cloth 5 X 7½ 207 pp.
Illustrated

Evolution of Preventive Medicine\$3.00
By SIR ARTHUR NEWSHOLME

The story of public health and preventive medicine is told in this work for the first time by a distinguished authority, who has himself contributed much to the subject.

A fascinating record of medical triumphs.

Cloth 5 X 7½ 226 pp.
Illustrated

The Meaning of Disease \$3.00
By WILLIAM A. WHITE, M.D.

The last thing anyone finds out about a science is "what is it all about?"

Dr. White attempts to supply the answer to this query as applied to medicine.

His definition of disease is both thought-provoking and informative.

Boards 5 X 7½ 220 pp.
