For School Use

Teachers, Professors, Librarians and Club Leaders should take advantage of

The Science News-Letter

This weekly publication is a living textbook—it vitalizes science study—it brings to classes the news of the world in science. Through our contact with the scientific world we cover

Every Field of Science

No book can give you the material we offer in the **SCIENCE NEWS-LETTER** as a year's subscription to this worthwhile publication contains enough scientific matter to fill five large books. Also the **SCIENCE NEWS-LETTER** gives information months and even years before it can be published in book form.

Multiple copies (10 or more) for class room use are 6 cents a week.

The B N A

Arranged as an Outline of

Regional and Systematic Anatomy

A Contribution to the Science and Teaching of Anatomy

BY

Victor E. Emmel

*Professor of Anatomy, College of Medicine, University of Illinois
Laboratory Guest at The Wistar Institute of Anatomy and Biology*

REVISED SECOND EDITION

The Basle Anatomical Nomenclature (the B N A) has been pre-eminently successful in the elimination of approximately 45,000 unnecessary synonyms for the macroscopic structures of the human body, and has consequently become an international anatomic language.

This list of some 5,000 terms, intended for common use in the medical schools, was arranged on the basis of systematic human anatomy.

It appears obvious, however, that, from the standpoint of practical anatomy, a regional arrangement of these terms in conjunction with their systematic tabulation would greatly increase the usefulness of the B N A.

With this objective in mind, the present systematic B N A has been expanded to include a correlated regional arrangement of anatomical terms—an arrangement based upon the sequence in which the structures indicated by these terms may be exposed and demonstrated to the naked eye in actual dissection—thus securing a direct association of the term with the visualization of the structure to which it refers.

Although a minimum encroachment upon individual initiative is evaluated as a dominant objective to be sought, concise statements are given for the more difficult incisions and dissections involved in the demonstration of the structures listed. The order in which the regions are dealt with is based upon a sequence which facilitates observation of those structural relationships of greatest practical significance. The work consequently constitutes a basis for a direct correlation of anatomical terminology and structure in the practical study of the cadaver and presents a résumé of regional and systematic anatomy for anatomical and clinical reference.

This book of about 250 pages, illustrated with twelve plates and figures in delineation of surface anatomy and surface projections of the skeleton, will be ready September 15, 1927. Price, \$3.50, bound in cloth.

How to Use Key-Word Feature of News-Letter

In order to aid in catching the items that concern you and to facilitate clipping and filing, a key word in small capitals has been printed on the right of the line above each article. The key words used fit into any system of classification, whether it be a straight alphabetical file, a system of your own devising, the Library of Congress classification or the Dewey system.

Note that you can slip out any article without fear of damaging another article in which you might be interested, since editorial matter printed on the right-hand pages is backed by advertising, standing matter or a continuation of the article on the other side.

Library of Congress Classification

The classification of the Library of Congress has come into common use in the libraries of the country owing to the publication of the Government of the card index of all new books. We print below a list of the subject titles which are most used in the SCIENCE NEWS-LETTER. The full scheme of classification is contained in "Outline Scheme of Classes," issued by the Library of Congress.
