

Your Words—do they always SAY what you mean?

They mirror your mind—those thousands of words you use daily.

They are teeming with power to make you a business and social success—or to stamp you, in spite of your education, as a person of loose-thinking habits.

You have realized this. Yet how often have you found yourself unable to write or say just what you wished—to use words accurately, forcibly, exactly—without seeming stilted.

How often you halt and stumble, perhaps at critical moments, groping vainly; wondering "What is the right word to use here."

YOU CAN MAKE WORDS FIT LIKE GLOVES

Why falter, and become self-conscious; when you can have all the language at your command? Your problem has been solved for you by the foremost philologist of the past hundred years, Prof. Francis Andrew March, the man sought by practically every leading dictionary maker in America and England as consulting editor, the court of last resort.

MARCH'S THESAURUS DICTIONARY

makes you master of the whole living language

The illimitable wealth of words from which the ablest speakers and writers draw, is yours through this master-volume—the result of eighteen years' work of Prof. March and his almost equally famous son. No man of the past hundred years was so well fitted to write with authority the definitions of words of the English language and to differentiate between shades of meaning. None other had so stupendous a vocabulary. No other book known has been granted a patent on its contents in the United States and abroad; none other has duplicated that remarkable reference group arrangement by which any desired word to express any idea or shade of meaning can be quickly found even by a school child.

Dictionaries merely define the words you know. The previous attempts at thesaurus making merely indexed the words, left out definitions and required you to use a dictionary also. Even this indexing system was not altogether alphabetic, therefore finding words was troublesome. March's Thesaurus Dictionary both finds the word and defines it; is the first and only Thesaurus Dictionary defining the words clearly so that exact shades of meaning are apparent to all, and so arranged by reference groups that you can instantly find any desired word, its synonyms or associated words, and its antonyms or opposites.

Hailed as "the chiefest tool of the writing man," it has been so greatly appreciated by business men and parents as well as by authors, editors, ministers, lawyers, etc., that three large editions have been exhausted and even used copies have commanded a premium over publication price.

THE NEW AMPLIFIED EDITION, RECENTLY OFF PRESS

is the first edition published at a low popular price—a mere fraction of the cost of the three preceding editions. It contains all that made March's Thesaurus Dictionary "a reference book of international fame" (World's Work), plus all the newer words, all the important words from arts and sciences, complete text-books on English grammar, composition, evolution of the language, word-building, etc., and historic, geographic and Biblical material nowhere else found in any one volume. Famous characters of literature and their dominating traits, pseudonyms, etc.

INSPECT IT AT OUR RISK. So sure are we that this book will appeal to you because of the wonderful material found on its 1462 pages that we want you to judge it for yourself. A handy volume, measuring 7¼ inches x 10¼ inches x 2¾ inches thick, durably bound in handsome buckram, with gold stamped title and marbled edges. Not heavy because of the use of special thin, opaque paper.

SEND THE COUPON, get this book. Notice how it makes increasing your knowledge and enlarging your vocabulary as interesting as a game; how it answers the thousand questions which arise daily.

Say you saw it advertised in the SCIENCE NEWS-LETTER

1462 Pages, each 7¼" x 10¼". Only 2¾" thick. Bound in handsome buckram.

"—cannot be too highly praised."
—*Forum*.

"Unmistakably the greatest single-volume reference work in the world."
—*Writers' Monthly*.

"—a real treasure chest of 'English undefiled.' We commend it unreservedly."
—*Review of Reviews*.

BINDER COVERS

FOR
SCIENCE NEWS-LETTER

Many subscribers have expressed a desire for a convenient binder in which to file their copies of the Science News-Letter. We therefore have prepared an attractive and durable loose-leaf binder-cover of gray leather-like stock, printed in dark green and complete with fasteners. Each binder-cover will hold one volume (six months or 26 issues).

To facilitate punching the issues of the Science News-Letter to fit this binder-cover, a pattern showing where holes should be placed appears each week on the back cover page.

To obtain a binder-cover, send 20 cents in stamps (make them 2s, please), together with your name and address (please print) to

Do You Know That—

Florida has two national forests.

The London Zoo has a hospital for ailing reptiles.

New York is taking steps to regulate and supervise aviation.

Two Italian universities are planning to establish courses in film technique and film chemistry.

A method of spraying metal on wood in order to prevent the ravages of boring insects has been invented.

A new virus to protect chickens against chickenpox has been reported by a veterinarian at the University of California.

The Church of the Holy Sepulchre at Jerusalem was seriously damaged by earthquake last July, and the dome is now being repaired.

Among the royal jewels from Russia is a figure of a goddess over seven inches tall carved from the largest known emerald in existence.

How to Use Key-Word Feature of News-Letter

In order to aid in catching the items that concern you and to facilitate clipping and filing, a key word in small capitals has been printed on the right of the line above each article. The key words used fit into any system of classification, whether it be a straight alphabetical file, a system of your own devising, the Library of Congress classification or the Dewey system.

Note that you can clip out any article without fear of damaging another article in which you might be interested, since editorial matter printed on the right-hand pages is backed by advertising, standing matter or a continuation of the article on the other side.

Library of Congress Classification

The classification of the Library of Congress has come into common use in the libraries of the country owing to the publication by the Government of the card index of all new books. We print below a list of the subject titles which are most used in the SCIENCE NEWS-LETTER. The full scheme of classification is contained in "Outline Scheme of Classes," issued by the Library of Congress.
