China, home of the silkworm, is entering the artificial silk industry.

Almost 200 rare tortoises brought back from the Galapagos Islands are to be used for breeding in the hope that they may be introduced into this country as an economic asset.

In producing helium the helium bearing gas is cooled to about 300 degrees below zero, at which state all of the constituents of the gas except the helium are reduced to liquid, and the helium gas is then drawn off and compressed into tank cars or steel cylinders for shipment.

THE LIVING TEXTBOOK

Nothing will vitalize science teaching more than a close contact with the actual frontier of man's intellectual conquest of nature.

When earthquakes destroy, physicists probe, chemists create, archæologists dig, biologists discover, or philosophers think, the results of their labors are reported in the

SCIENCE NEWS-LETTER

No better supplementary reading can be provided for pupils in general science, chemistry, physics, biology, or any other science.

Even the history of science is vitalized by the "Classics of Science" which give the details of epochal discoveries in science in the exact words of the great scientists.

Every student should be given his own copy of the Science News-Letter to clip, read and absorb.

Reduced subscription rates for class orders of 10 copies or more to the same address are only 5 cents a copy per week (only \$1.80 for the school year).

Enough samples for the entire class will be sent in September if you write now to:

How to Use Index Word Feature

Classification

In order to aid in catching the items that concern you and to facilitate clipping and filing, a key-word in italics is printed under the heading of each article. The key words used fit into any system of classification, whether it be a straight alphabetical file, a system of your own devising, the Library of Congress classification or the Dewey system.

Note that you can clip out any article without fear of damaging another original article in which you might be interested, since editorial matter printed on the right-hand pages is backed by advertising, standing matter, a continuation of the article on the other side, or reprinted quotations.

Library of Congress Classification

The classification of the Library of Congress has come into use owing to the publication by the government of the card index of all new books. We print below a list of the subject titles which are most used in the SCIENCE NEWS-LETTER. The full scheme of classification is contained in "Outline Scheme of Classes," issued by the Library of Congress.
