BEYOND ALADDIN'S DREAM

Djinns of a New Generation Make these Palaces Possible

Vol. XIV

No. 389

Are you blindly groping for words to fit your thoughts?

"What word conveys the exact shade of meaning I desire?"

"Is there a better word than the one I am using?"

"What is that word I have forgotten?"

"Is there a word in the language which expresses my thought clearly?"

"How can I avoid this constant repetition?"

STRANGE, isn't it, with all the marvellous wealth of our English language that you should find yourself groping blindly for the answers to such word questions as those above.

Strange, with a language so full of expressive words, that it should be so difficult to find the ones that express your thoughts clearly.

With more than 150 words describing various shades of beauty, or over 400 words denoting various degrees of goodness, for instance, why should it be so hard to find the best one for your purpose?

Yet it is not strange either, when you consider that dictionaries are arranged on the assumption that you know all of the more than 200,000 words in the language and seek merely their definitions—that all attempts to make the language available stopped with merely listing the words by ideas, and then not always in alphabetical order.

No wonder the average working vocabulary is less than 2500 words—that you find it so difficult to express your thoughts and your most powerful ideas become mere vague impressions in the minds of your listeners or readers.

But now comes a new book which revolutionizes word helps—a book which finds the words for you, and at the same time defines them. Now you can have at your very fingertips the definite, living words that fit your thoughts and leave no doubt as to your meaning.

The illimitable wealth of words from which the ablest writers and speakers draw—the whole living language—becomes your working vocabulary through the remarkable invention and eighteen years of untiring effort by a master of words which gives you **March's Thesaurus Dictionary**.

It Places the Whole Living Language at Your Instant Command

No matter what thought you wish to express, or which particular shade of meaning you desire, **March's Thesaurus Dictionary** gives you the word *instantly*.

No hunting through hundreds of words and definitions—just a flip of the pages and your word is before you grouped with its related words under the part of speech to which it belongs and defined so that you know you are using it correctly. In adjoining columns are its antonyms—enabling you to develop versatility of style.

Foreign words and idioms are also arranged so that you can find the words to fit your ideas immediately.

The New Amplified Edition

contains all that has made March's Thesaurus Dictionary "Unmistakably the greatest single-volume reference work in the world" (*Writer's Monthly*) plus the newest words, including those which arose out of the World War and the progress of the arts, etc., and a listing of all the important words and definitions of the leading arts and sciences.

In addition it contains hundreds of usually hard-to-find facts which you need daily; chapters which are complete, concise textbooks on English, composition, word building, Biblical references, geographic and historic facts, lists of the famous characters of literature, American Sobriquet, etc., which increase its value to you beyond computation.

A veritable Treasure House of Words and Knowledge! No wonder the leading magazines are saying of it:

"A real treasure chest of 'English undefiled.' We commend it unreservedly."

—Review of Reviews.

"A valuable contribution to the cause of clarity and accurate word selection."

—Independent.

"Will be of constant use on the writing desk."

—American Mercury.

"—cannot be too highly praised."—Forum.

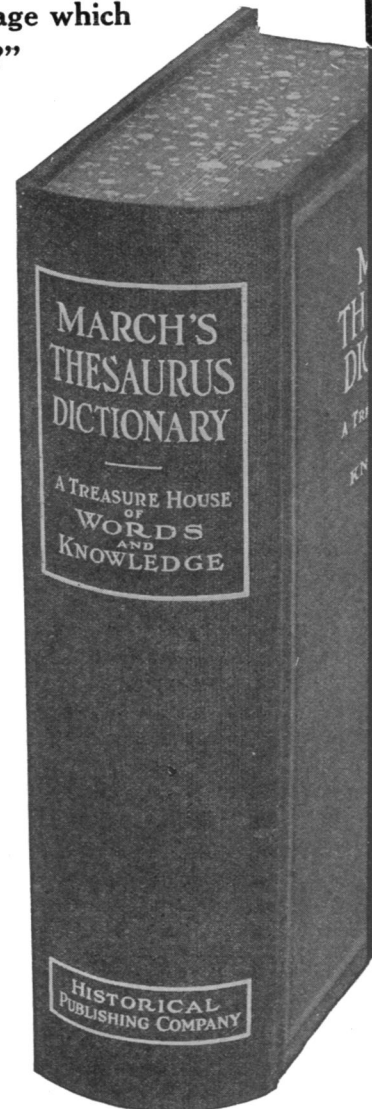

"—leads the mind to associations wholly unexpected and defines them with shades of meaning so that exactness and fluency are obtained."

—Harper's.

"Supplies just the right word you need for each shade of meaning." —World's Work.

Examine It in Your Own Home—at Our Risk

Let us send you this remarkable volume that you may judge it in your own home. We want you to examine it at your leisure—to try it for ten days at our risk. We want you to see what complete mastery of the English language its 1462 pages give you. It is bound in handsome buckram—a worthy addition to any library—7¾" x 10¼" x 2¾", and surprisingly handy because of the thin, lightweight opaque paper used. Just send in the coupon. If you do not find that it completely answers the word problems which confront you, you have but to return it and it has not cost you a cent.

Historical Publishing Co.,
Dept. SC-9, 1334 Cherry Street,
Philadelphia, Pa.

Please send me (postpaid in U. S. and Canada) a copy of the new Amplified Edition of March's Thesaurus Dictionary. I will pay the postman \$3.00 plus 12c C. O. D. fee, and if I keep the book will pay you \$2.00 per month for three months. (Canada, duty extra. Foreign, \$10.00, cash with order.)

If for any reason I do not wish to keep it I will return it in good condition within 10 days and you are to refund my \$3.12.

Reducing Valves—Needle Valves—Flo-Gages
Valvo-Gages—Micrometric Controls

IF YOU ARE USING any compressed gas—hydrogen, oxygen, air, etc., you need Hoke equipment for regulating your delivery pressures. These devices obviate the danger, dirt, and expense attending the use of generators.

Tanks of compressed gases are available everywhere; and with Hoke equipment you can obtain exactly the pressure you want without spurting, sucking back, or interruption.

Models for all purposes, all purses. Some suitable for use with the corrosive gases. Prices, \$1.00 to \$39.00.

For exacting work a reducing valve, such as illustrated, is best. But in many cases a simpler and cheaper device is adequate.

Used in pH determinations; when running combustions; reduction with hydrogen; calorimetry; bubbling gases through solutions; with oxygen blowpipes; for spraying with compressed air. And countless other jobs.

Shall we send you one of these to try?

This is one of the Hoke glassworking burners. It is a very versatile burner, being suitable for every kind of job, large or small.

With soft glass, use gas and air. Either a large or small flame, either sharp or brushlike, is possible.

With Pyrex glass, use gas plus air and more or less oxygen, as needed.

With quartz, use gas and oxygen.

Shall we send you one to try?

CAMERA TROPHIES 1928

SPEAKING of adventures—we were bent on getting motion pictures of those wild red foxes way over back of farmer Alvord's place, but what a battle of wits we got into! The old lady moved her cubs three times. Twice we were able to follow: then she lost us. Two weeks of work and 180 feet of film—but what film!

Then I perched three hours 60 feet up a sugar maple, concealed under my "magic carpet" blind, and took rarest shot of red-tailed hawk arriving home, mouse dangling from her beak like a princess's pendent ear-ring!

Also this season, up in Nova Scotia, I captured the shy minister gull on my motion picture film, and intimate camera interviews have I had with the osprey.

These trophies will be added to the already rich material included in my illustrated platform lecture—**Wild Life Adventures**—a favorite among schools and, I am told, an inspiration to students and teachers alike.

There are other subjects, too, including **Cruising the Canadian Labrador**, a pictorial story about the now famous Greenly Island country.

(Note: Fall and early winter will be spent in the east. Early in 1929 I go to the middle west.)

Let me send you an illustrated circular.

The true radical is a man who thinks you are against him if you can't get as excited as he does.

Leica Negatives can be enlarged to 12x18 inches

Leica

"THE UNIVERSAL CAMERA"

Keeps instruction material up-to-date

Uses Standard Cinema Film

One Loading Yields 36 Pictures

Double Exposure Impossible

Makes pictures 1 x 1 3/8" for notes or other class and record work

Projection films for instruction and entertainment

Field trips, laboratory work, class or school meetings and many other current activities can be recorded on the "Leica" to supplement the more formal text material. From these negatives one can produce contact prints, enlargements or film slides. The latter for projection in the ULEJA Projector which will accommodate either "standard frame" (1" x 3/4") or "Leica standard" (1" x 1 3/8").

Fingerprints left by famous painters on their canvases sometimes prove added evidence of the authenticity of a doubtful painting.

A recent discovery of a silk cocoon dating back to 3000 B. C. showed that the silk industry in China is at least 1,000 years older than had been supposed.

The skeleton of a great prehistoric rhinoceros recently found in Russia is so large that a man would reach only to the creature's knee.

Shining tin pans are not such good conductors of heat as tinware that has become dulled by use, according to Cornell University home economics specialists.

MILLIKAN-GALE-PYLE

Elements of Physics

Why not add your high-school to the long list now finding their expectations realized in this new book? All the modern developments in science, all the interesting practical applications of science are here. There are brief, helpful summaries, many full-page illustrations, and exceptionally good problems and questions. And, as an added feature, the organization permits easy adaptation for a minimum or maximum course. \$1.64, subject to discount.

**MILLIKAN AND GALE
AND EDWARDS**

A First Course in Physics for Colleges

Published in August, 1928, this new book is primarily for students who take their first course in physics in college. Its distinguished authorship guarantees its accuracy and dependability. Outstanding features are the emphasis on essentials, "selling the subject to the student," the solved problems embodied in the text, and the substitution of test questions for summaries. \$3.72.

THREE-IN-ONE PUBLICATION

The dynamics of instant and extensive publication are enjoyed if you publish in any of the following journals:

- Journal of Morphology and Physiology*
- The Journal of Comparative Neurology*
- The American Journal of Anatomy*
- The Anatomical Record*
- The Journal of Experimental Zoölogy*
- American Journal of Physical Anthropology*
- The American Anatomical Memoirs*
- The Biological Bulletin (M. B. L., Woods Hole, Mass.)*
- Folia Anatomica Japonica (Tokio, Japan)*
- The Journal of Parasitology (Urbana, Ill.)*
- The Australian Journal of Experimental Biology and Medical Science (Adelaide, South Australia)*
- Stain Technology (Geneva, New York)*
- Physiological Zoölogy (Chicago, Ill.)*

Why?

1. Because the author's abstract of every article is printed immediately and extensively distributed in the Advance Abstract Sheets of The Wistar Institute Bibliographic Service.
2. Because The Wistar Institute Bibliographic Service Card giving the author's abstract and the complete bibliographic reference is published shortly after the Advance Abstract Sheet is issued.
3. Because the complete article then appears promptly in one of the above journals.

Reprints supplied.

Advance Abstract Sheets.....\$3.00 per year
Bibliographic Service Cards.....\$5.00 per year

A NEW BIOLOGY SUPPLY CATALOG

This new MILVAY Biological Supply Catalog No. 40S is the most complete publication of its kind available. Its 192 pages are profusely illustrated and all materials included are fully described.

In it will be found complete listings of the following:

- Preserved Botanical Materials*
- Preserved Zoological Materials*
- Museum Preparations (botany and zoology)*
- Osteology Preparations (all classes)*
- Spalteholz Preparations*
- Microscopic Slides, complete listings*
- Charts and Models*
- Microscopes, Microtomes, etc.*
- Specimen Jars*
- Bacteria Counting Apparatus*
- All Biological Apparatus*
- Aquariums*
- Lantern Slides*

If you have not already received this catalog, fill out the following, mail to us, and No. 40S MILVAY Biological Supply Catalog will be forwarded to you immediately without charge.
