NEW PLANET PORTRAIT

Lowell Observatory Proudly Photographs Its Discovery

(See page 197)

Vol. XVII

No. 468

Are you blindly groping for words to fit your thoughts?

"What word conveys the exact shade of meaning I desire?"

"Is there a better word than the one I am using?"

"What is that word I have forgotten?"

"Is there a word in the language which expresses my thought clearly?"

"How can I avoid this constant repetition?"

STRANGE, isn't it, with all the marvelous wealth of our English language that you should find yourself groping blindly for the answers to such word questions as those above.

Strange, with a language so full of expressive words, that it should be so difficult to find the ones that express your thoughts clearly.

With more than 150 words describing various shades of beauty, or over 400 words denoting various degrees of goodness, for instance, why should it be so hard to find the best one for your purpose?

Yet it is not strange either, when you consider that dictionaries are arranged on the assumption that you know all of the more than 200,000 words in the language and seek merely their definitions—that all attempts to make the language available stopped with merely listing the words by ideas, and then not always in alphabetical order.

No wonder the average working vocabulary is less than 2500 words—that you find it so difficult to express your thoughts and your most powerful ideas become mere vague impressions in the minds of your listeners or readers.

But now comes a new book which revolutionizes word helps—a book which finds the words for you, and at the same time defines them. Now you can have at your very fingertips the definite, living words that fit your thoughts and leave no doubt as to your meaning.

The illimitable wealth of words from which the ablest writers and speakers draw—the whole living language—becomes your working vocabulary through the remarkable invention and eighteen years of untiring effort by a master of words which give you **March's Thesaurus Dictionary**.

It Places the Whole Living Language at Your Instant Command

No matter what thought you wish to express, or which particular shade of meaning you desire, **March's Thesaurus Dictionary** gives you the word *instantly*.

No hunting through hundreds of words and definitions—just a flip of the pages and your word is before you grouped with its related words under the part of speech to which it belongs and defined so that you know you are using it *correctly*. In adjoining columns are its antonyms—enabling you to develop versatility of style.

Foreign words and idioms are also arranged so that you can find the words to fit your ideas immediately.

The New Amplified Edition

contains all that has made March's Thesaurus Dictionary "Unmistakably the greatest single-volume reference work in the world" (*Writer's Monthly*) plus the newest words, including those which arose out of the World War and the progress of the arts, etc., and a listing of all the important words and definitions of the leading arts and sciences.

In addition it contains hundreds of usually hard-to-find facts which you need daily; chapters which are complete, concise textbooks on English, composition, word building, Biblical references, geographic and historic facts, lists of the famous characters of literature, American Sobriquet, etc., which increase its value to you beyond computation.

A veritable Treasure House of Words and Knowledge! No wonder the leading magazines are saying of it:

"A real treasure chest of 'English undefiled.' We commend it unreservedly."

—Review of Reviews.

"A valuable contribution to the cause of clarity and accurate word selection."

—Independent.

"Will be of constant use on the writing desk."

—American Mercury.

"—cannot be too highly praised."—Forum.

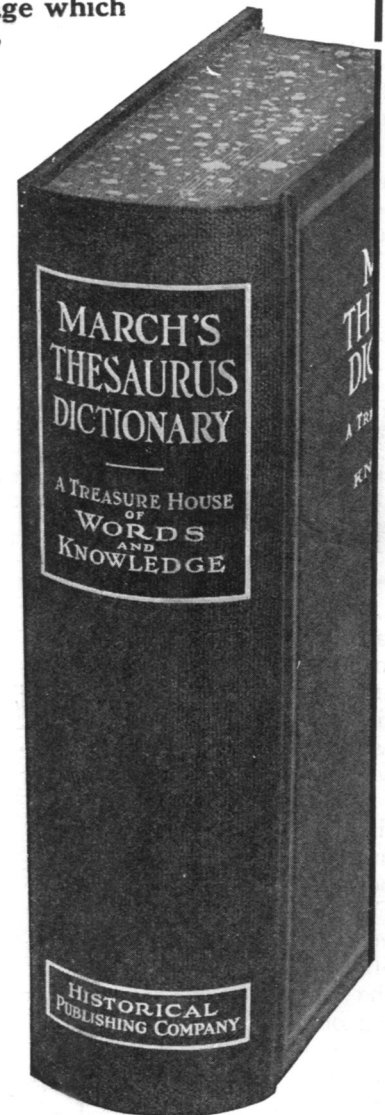

"—leads the mind to associations wholly unexpected and defines them with shades of meaning so that exactness and fluency are obtained."

—Harper's.

"Supplies just the right word you need for each shade of meaning." —World's Work.

Examine It in Your Own Home—at Our Risk

Let us send you this remarkable volume that you may judge it in your own home. We want you to examine it at your leisure—to try it for ten days at our risk. We want you to see what complete mastery of the English language its 1462 pages give you. It is bound in handsome buckram—a worthy addition to any library—7 $\frac{3}{4}$ " x 10 $\frac{1}{4}$ " x 2 $\frac{3}{4}$ ", and surprisingly handy because of the thin, light-weight opaque paper used. Just send in the coupon. If you do not find that it completely answers the word problems which confront you, you have but to return it and it has not cost you a cent.

Historical Publishing Co.,
Dept. SC-3, 1334 Cherry Street,
Philadelphia, Pa.

Please send me (postpaid in U. S.; express paid in Canada) the New Amplified Edition of March's Thesaurus Dictionary. I will pay \$3.75 on delivery and if I keep the book will pay you \$2.00 per month for three months. (Canada, duty extra; Foreign, \$10.00, cash with order.) If for any reason I do not wish to keep it, I will return it in good condition within 10 days and you are to refund my \$3.75.

High-School Science and Physics Teachers

The Ideal Way to Interest Your Students in Radio!

WITHIN the last year there has been evinced an increasing demand for a short, simple and cheap booklet which can be utilized to interest high-school classes in the principles of radio communication (not the listening to broadcast programs) and which will enable them to build a complete short-wave transmitter and receiver.

Largely in response to this demand the American Radio Relay League, the national non-commercial association of radio amateurs, has prepared a 32-page illustrated booklet, attractively gotten up, which completely covers the construction, installation and operation of a single simple receiver and transmitter. It has been designed particularly for students between the ages of 14 and 21 and is suitable for anyone of high-school age. It enables its readers to qualify as radio amateurs and engage in two-way radio communication with other amateurs over hundreds of miles.

The booklet has been made to sell at the low price of ten cents but is available in quantity at the price of \$1 per dozen copies, postpaid. We believe it affords an ideal way of starting boys in the more serious side of radio and yet at lower expenditure than the usual high-priced handbooks and manuals. The booklet is complete and thoroughly covers all details of putting a complete "station" in operation, from suggestions for learning the code to instructions for procuring licenses and operating properly, particularly in explaining the construction of fine but simple apparatus from inexpensive parts. It has been carefully prepared to answer every question and is clearly illustrated to show every detail of construction.

The pursuit of amateur radio, through individual or school stations, is the ideal method of learning radio communication, a field of unbounded possibilities. Amateur radio, in the building and operation of such a station as described in this booklet, fully embodies the principles of learning by application. Students find it an absorbing study, a fascinating hobby—and so do their instructors.
