The Weekly Summary of

Current Science

SCIENCE SERVICE

The Institution for the Popularization of Science organized under the auspices of the National Academy of Sciences, the National Research Council and the American Association for the Advancement of Science.

Edited by WATSON DAVIS

Subscription rates—\$5.00 a year postpaid; two years, \$7.00; 15 cents a copy. Ten or more copies to same address, 5 cents a copy. Back numbers more than six months old, 25 cents.

In requesting change of address, please give old as well as new address.

Advertising rates furnished on application.

Board of Trustees of Science Service

Board of Trustees of Science Service

Honorary President, William E. Ritter, University of California. Representing the American Association for the Advancement of Science, I. McKeen Cattell, President, Editor, Science, Garrison, N. Y.; Burton E. Livingston, Johns Hopkins University, Baltimore, Md.; Raymond Pearl, Director, Institute for Biological Research, Johns Hopkins University, Baltimore, Md. Representing the National Academy of Sciences, W. H. Howell, Vice-President and Chairman of Executive Committee, National Research Council, Washington, D. C.; R. A. Millikan, Director, Norman Bridge Laboratory of Physics, California Institute of Technology, Pasadena, Calif.; David White, Senior Geologist, U. S. Geological Survey. Representing National Research Council, Vernon Kellogg, Secretary Emeritus, National Research Council, Washington, D. C.; C. Abbot, Secretary, Smithsonian Institution, Washington, D. C.; Harrison E. Howe, Editor of Industrial and Engineering Chemistry. Representing Journalistic Profession, John H. Finley, Associate Editor, New York Times; Mark Sullivan, Writer, Washington, D. C.; Marlen E. Pew, Editor of Editor and Publisher, New York City, Representing E. W. Scripps Estate, Harry L. Smithton, Treasurer, Cincinnati, Ohio; Robert P. Scripps, Scripps-Howard Newspapers, West Chester, Ohio; Thomas L. Sidlo, Cleveland, Ohio.

Staff of Science Service

Managing Editor, Watson Davis; Staff writers: Frank Thone, Emily C. Davis, Jane Stafford, Marjorie Van de Water, J. W. Young; Librarian, Minna Gill; Sales and Advertising Manager, Hallie Jenkins.

Manager, Hame Jenkins.

Copyright, 1932, by Science Service, Inc. Republication of any portion of the Science News Letter is strictly prohibited since it is distributed for personal, school, club or library used in the sonly. Newspapers, magazines and other publications are invited to avail themselves of the numerous syndicate services issued by Science Service, details and samples of which will gladly be sent on request. sent on request.

Members of the American Association for the Advancement of Science have the privilege of subscribing to the SCIENCE NEWS LETTER at the reduced price of \$3 per year. Application for this privilege should be accompanied by privilege card obtained from the Permanent Secretary, A. A. S., Smithsonian Institution Building, Washington, D. C.

Publication Office, 1930 Clifton Ave., Baltimore, Md. Editorial and Executive Office, Constitution Ave. at 21st St., N. W., Washington, D. C.

Address all communications to Washington, D. C. Cable address: Scienservc, Washington.

Entered as second class matter October 1, 1926, at the post-office at Baltimore, Md., under the act of March 3, 1879. Established in mimeographed form March 13, 1922. Title registered as trade-mark, U. S. and Canadian Patent

DO YOU KNOW THAT

Seedlings of the Big Trees, the giant Sequoias, are raised in a nursery in the Sequoia National Park, in California.

Sir Hubert Wilkins, British explorer, has designed a new submarine without propellers and rudders for cruising under the Arctic ice.

The evergreen forest of Siberia is the largest single mass of conifers in the world.

A new 3-story bus, made of lightweight metal and carrying 88 passengers, has been put into service in Italy.

Artificial ice came into use industrially about 1880.

A German scientist states that loss of 40 to 50 hairs from the head in a day is the "normal" limit.

Most woodpeckers bore round holes in trees, but the pileated woodpeckers dig both round and square holes.

Pelicans have no song and the adults no call-notes, while the young call for food with a low grunt, rising at times to a shrill scream.

Archaeologists exploring in Mesopotamia have discovered a tablet 4,000 years old inscribed with 50 missing lines of the famous story of Gilgamesh.

The pygmy owl of the Rocky Mountains region is not much larger than an English sparrow.

It is estimated that the world's population today is a little more than double the population of 100 years ago.

People in the United States spend \$15,000,000 a year on fraudulent cures, the Committee on the Cost of Medical Care reports.

Eggs are better than a spring tonic, in view of the iron, vitamins, and protein they contain, is the advice of the U. S. Bureau of Home Economics.

WITH THE SCIENCES THIS WEEK

CURIOSITY-AROUSING questions are prepared concerning the most interesting and important news in each issue. These questions should be a mental stimulant for the adult reader and a boon to the teacher who uses the Science News Letter to add zest to her classroom instruction.

Book reference in italic type is not the source of information of the article, but a reference for further reading on the subject of the article. Books cited can be supplied by Librarian, Science Service, at publisher's price, prepaid in U.S.

ANTHROPOLOGY

Do all white infants have blue eyes? p. 361 The Child's Heredity—Paul Popenoe—Williams & Wilkins, 1929, \$2.

ARCHAEOLOGY

Why is it impossible to give the original location of the stope tablet bearing the Uzziah inscription? p. 362

ASTRONOMY

What is the celestial equator? p. 357 What is the first star found to be double? p. 354. Field Book of the Skies—W. T. Olcott and E. W. Putnam—Putnam, 1929, \$3.50.

AVIATION

Why are engineers installing auxiliary wings on airplanes? p. 353. The Airplane—Frederick Bedell and T. E. Thompson—Van Nostrand, 1930, \$3.75.

What is the difference between a "toadstool" and a "mushroom"? p. 356

Why has Bouncing Bet been given the generic name which, being translated, means soapwort? p. 362

CHEMISTRY

What is the relation between a flour's "gassing power" and its "diastatic" activity? p. 353.

Spruce and fir forests indicate what sort of climate? p. 357. Forests and Mankind—C. L. Pack and Tom Gill—MacMillan, 1929, \$3.

ENGINEERING

What is the speed of the energized rotor inside the generator pictured on the cover of this week's SCIENCE NEWS LETTER? p. 357
Why has New Orleans always had to pump itself out from under rain water? p. 359

ENTOMOLOGY

What extracts were used in an unique attack on the Japanese beetle? p. 357

GEOPHYSICS
Where does radium on the ocean bottom come from? p. 352

MEDICINE
How has the diet of Mexicans been described? p. 356

PHYSICS
How may Einstein's latest achievement be said to give law unto the behavior of the infinitesimal? p. 351

PHYSIOLOGY

Do nerves produce hormones? p. 352 Two families have broken what rule in the "taste blind" test? p. 356

PSYCHIATRY

PSYCHIATRY
Before their mental breakdown, what were
the characteristics of the nine patients studied
by a Rhode Island psychiatrist? p. 360
When the right half of the brain is dominant,
what physical characteristic is an individual apt

to possess? p. 363

PSYCHOLOGY
How is a teacher likely to know that the parents of her pupils do not live happily together? p. 352
