DO YOU KNOW?

An Oxford University expedition will spend a year in North-East Land, far above the Arctic Circle.

In the pine regions of Oregon and Washington, pine beetles destroy eight times as much timber as forest fires.

Archaeologists digging at an old Alaskan village have found for the first time wooden canoes made by Eskimos.

A moving picture has been made to record the fundamentals of baseballbatting, pitching, fielding and base run-

Seed for growing the odorless cabbage developed at Cornell University will not be available in quantity for about two years.

For eight years the Brooklyn Botanic Garden has given a course to student nurses, teaching such subjects as the care of cut flowers.

California raisin growers have tried greasing" seedless raisins before packing, using oil extracted from raisin seeds to prevent stickiness.

The rare occurrence of triplets born to a mother in a herd of American bison is reported from Catalina Island, California.

Dental students at the University of California study effects of nutrition on teeth by checking up on their own eating habits.

Contrary to popular belief, the United States before the World War had a chemical production greatly exceeding that of Germany.

Hogs were reduced by 20,000,000 last year, which is called "the most striking annual change ever shown in this country's livestock inventory."

A German high school teacher kept a weather record from 1819 until he died in 1872, and his daughter continued it until 1917, making a 98-year

The skill of blind persons in using their other senses to guide and inform them was commented on as early as 1749 when Diderot published a "Letter on the Blind."

WITH THE SCIENCES THIS WEEK

Most articles are based on communication to Science Service or papers before meetings, but where published sources are used they are referred to in the articles.

What aid has been found to the reading of the ancient Mixtec language? p. 211.

ARCHAEOLOGY—TEXTILES

Did Mayan designers borrow patterns from other nations? p. 220.

ASTRONOMY

What change is occurring in the Pleiades? p.

What may be the origin of nebulae? p. 215.

BACTERIOLOGY

How early in life are the body tissues infected with bacteria? p. 215.

CLIMATOLOGY

How long has eastern Colorado been without rain? p. 213.

Why is too much cereal harmful to a child? p. 216.

GEOGRAPHY

Will the West always be dry? p. 212.

ICHTHOLOGY

Can a fish be drowned? p. 222.

What expedition is to study the food of the Mayan people? p. 216.

MEDICINE

How frequently are Americans admitted to hospitals? p. 216.

What value does snake venom have in medicine? p. 216.

METALLURGY

How are "Etruscan beadlets" made? p. 217.

What is the prospect for irrigation water in the Pacific Coast states? p. 213.

PALEONTOLOGY

Where did a paleontologist discover a real ''lost world''? p. 218.

How long does a drink of water stay in the body? p. 212.

What gas is an aid in preventing mountain sickness? p. 214.

PHYSICS

How much energy reaches earth in the form of cosmic rays? p. 214.

Why do dust storms make the air appear blue? D. 211.

PUBLIC HEALTH

Where do American children grow largest? p. 217.

ZOOLOGY

What do jellyfish feed on? p. 217.
