ERRATA, Vol. XXX, Nos. 795-820, July-December, 1936

| PAGE | TITLE BEGINS | CORRECTIONS |
|------|------------------------|---|
| 65 | PREPARED | Caption, Henrietta for Henriette |
| 63 | Nature | See SNL, Nov. 21, p. 333. |
| 70 | Blood Pigment | Delete par. 6. |
| 73 | X-Ray | Par. 4, line 2, clinched for cinched. |
| 74 | The Soybean | Col. 3, line 4, two-thirds for one third. Line 5, one third for two thirds. |
| 105 | To Broadcast | Line 6, 440 for four hundred. |
| 135 | New Knowledge | Line 1, after Using insert evening. Line 8, after two new should read mutant types. Line 10, type for variety of the species. Line 14, type for strain. Line 15, delete after the solid stem it grows between the ovary and style. Line 18, new gene mutation for separate and distinct strain. Par. 3, line 7, three for four. Par. 5, line 3, before primroses insert evening. Par. 5, line 5, delete all, types for strains. Par. 6, line 6, after stigmas should read which are the basis of the name "pollicata." Par. 7, line 6, particular type for solid-stemmed variety. |
| 171 | Long-Range Forecasting | Col. 2, par. 1, see SNL, Sept. 26, p. 201. |
| 197 | "Coldest" Star | Col. 2, line 9, Centauri Proxima for Alpha Centauri. |
| 232 | Pacific Once | Par. 2, line 2, plesiosaurs for dinosaurs. Par. 3, line 1, after University insert of Wyoming. |
| 297 | Big Trees | Line 6, delete near Hillsborough, Calif. Line 6, High Sierra for high Sierras. |
| 309 | New Germs | Caption, last line, diameters for times. |
| 324 | POSITRON | Illustration upside down. |
| 359 | Growth Speeding | Method of giving thymus extract and glutathione was injection not feeding. |
| 363 | Old Glass | Col. 3, line 34, woven for oven. |
| 371 | Seedless Fruits | Par. 4, line 5, after technique should read of Prof. Friedrich Laibach of Germany. |
