A SCIENCE SERVICE PUBLICATION

Do You Know?

There are 54 active volcanoes in Japan.

It is estimated that insects destroy at least one-tenth of everything man grows.

Most young children like the flavor of cod liver oil or other fish oils, nursery schools observe.

Golden eagles still nest in North Dakota's badlands, but many are killed each winter because they prey on stock.

A British scientist suggests that the Romans seem to have twirled a spear when throwing it, to give the steadying advantage of axial spin.

The earliest treasury officials, as in ancient Egypt, had no money to handle, but had charge of farm products and other goods paid in taxes and tribute.

Non-breakable all-glass doors, that look like transparent partitions and open automatically by the electric-eye device, have been installed in a New York building.

Freak apples, having no seeds and exceptionally large for their variety, were produced last summer in a New Hampshire orchard, due to unusual weather conditions.

The speed of animals like the horse and deer is attributed by one anatomist to their rapid snap-kick stride, and most particularly to the lower bones of the leg being longer in proportion to the upper bones.

QUESTIONS DISCUSSED IN THIS ISSUE

Most articles which appear in Science News Letter are based on communications to Science Service, or on papers before meetings. Where published sources are used they are referred to in the article.

ARCHAEOLOGY

What do Indians think of white grave-robbers? page 100.

Of what use was a speaking tube in an ancient temple? page 109.

BIOCHEMISTRY

How many proteins are there? page 99.

CHEMISTRY

What is an ionic treadmill? page 109.

CLIMATOLOGY

Where are years of drought due? page 106.

ENGINEERING

How much money might a Public Works Department save the Government? page 104.

Why do intelligent men marry early? page 104.

FLORICULTURE

Under what climatic conditions do most house plants live? page 110.

What proportion of forest fires are of incendiary origin? page 110.

GEOLOGY

Where was the Yellowstone River before the Ice Age? page 110.

HISTORY OF MEDICINE

Where did quinine gets its name? page 105.

INVENTION

How will the "funnies" find voices? page

MATHEMATICS

How many googols in a googolplex? page

MINING

How much of our coal is now processed? page 108.

NAVAL ARCHITECTURE

Why may new liners be without smoke-stacks? page 105.

OCEANOGRAPHY

How much of the earth's surface is still unexplored? page 102.

How may war in the Far East affect your head colds? page 101.

PHOTOGRAPHY

When will color films be ready for use in any camera? page 109.

PHYSICS

How does the new electron furnace work? page 107.

PSYCHOLOGY

Why are clever men intractable? page 100.

PUBLIC HEALTH

What diseases are now on the increase? page 105.

SEISMOLOGY

How did the Hawaii earthquake records come to Washington? page 104.

How far away was the New Guinea earthquake felt? page 104.

A new, secret-formula glue makes electric-copper sheeting stick smoothly to

"No cold is a slight cold," warns a New York physician, pointing out that pneumonia usually begins with a cold.

The ten-cent perfume of today surpasses that for which caravans formerly risked their lives.

Children often acquire fear of dogs, insects, or darkness because they see adults showing fear of such things.

SCIENCE NEWS LETTER

FEBRUARY 12, 1938

The Weekly Summary of Current Science, published every Saturday by SCIENCE SERVICE, Inc., 2101 Constitution Avenue, Washington, D. C., Edited by WATSON DAVIS.

Subscriptions—\$5.00 a year; two years \$7.00; 15 cents a copy. Ten or more copies to same address, 5 cents a copy. Back numbers more than six months old, 25 cents.

six months old, 25 cents.

Members of the American Association for the Advancement of Science have privilege of subscribing to SCIENCE NEWS LETTER at the reduced price of \$3 per year. Applications for this privilege should be accompanied by privilege card obtained from the Permanent Secretary, A.A.A.S., Smithsonian Institution Building, Washington, D. C.

In requesting change of address, please give your old address as well as the new one, at least two weeks before change is to become effective.

Copyright, 1938, by Science Service, Inc. Republication of any portion of SCIENCE NEWS LETTER is strictly prohibited. Newspapers, magazines and other publications are invited to

avail themselves of the numerous syndicate services issued by Science Service. Cable address: Scienserve, Washington.

Cane address: Scienserve, Washington.
Entered as second class matter at the postoffice at Washington, D. C., under the act of
March 3, 1879. Established in mimeographed
form March 18, 1922. Title registered as trademark, U. S. and Canadian Patent Offices. Indexed in Readers' Guide to Periodical Literature
and in the Engineering Index.

Advertising rates on application. Member Audit Bureau of Circulation.

SCIENCE SERVICE is the Institution for the Popularization of Science organized 1921 as a non-profit corporation, with trustees nominated by the National Academy of Sciences, the National Research Council, the American Association for the Advancement of Science, the E. W. Scripps Estate and the journalistic profession.

Scripps Estate and the journalistic profession.

Board of Trustees—Honorary President: William E. Ritter,University of California, Representing the American Association for the Advancement of Science, J. McKeen Cattell, Editor, Science, Garrison, N. Y.; Henry B. Ward, University of Illinois, Urbana, Ill.; Edwin G. Conklin, President, American Philosophical Society, Philadelphia, Pa. Representing the National Academy of Sciences, W. H. Howell, Vice-Presi-

dent and Chairman of Executive Committee, Johns Hopkins University, Baltimore, Md.; R. A. Millikan, Director, Norman Bridge Laboratory of Physics, California Institute of Technology, Pasadena, Calif.; Harlow Shapley, Director, Harvard College Observatory, Cambridge, Mass. Representing National Research Council, Ludvig Hektoen, John McCormick Institute for Infectious Diseases, Chicago, Ill.; C. G. Abbot, Secretary, Smithsonian Institution, Washington, D. C.; Harrison E. Howe, Editor of Industrial and Engineering Chemistry, Washington, D. C. Representing Journalistic Profession; John H. Finley, Editor, New York Times, Mark Sullivan, Writer, Washington, D. C.; Dean Carl W. Ackerman, Columbia University Graduate School of Journalism, New York City, Representing E. W. Scripps Estate, Harry L. Smithton, Treasurer, Cincinnati, Ohio; Robert P. Scripps, Scripps-Howard Newspapers, West Chester, Ohio; Warren S. Thompson, Miami University, Oxford, Ohio.

Staff—Director, Watson Davis; Writers: Frank Thone, Emily C. Davis, Jane Stafford, Marjorie Van de Water, Robert Potter, Ronald L. Ives, Leonard Engel; Correspondents in principal cities and centers of research. Photographer: Fremont Davis; Librarian: Minna Gill; Sales and Advertising: Hallie Jenkins, Austin Winant, Howard Bandy.

Howard Bandy.
