A SCIENCE SERVICE PUBLICATION

Radiophoto - news pictures out of the air!

RCA radiophoto transmits pictures halfway around the world and prints them—in a matter of minutes!

And thanks to RCA research, pictures now come through the receiver (shown above) just about as sharp and clear as the originals themselves.

Through RCA radiophoto, today's "news shot" in Honolulu or Cairo can make tomorrow morning's front page. Or—blueprints for a disabled power generator can be flashed to London—saving hundreds of vital war production hours.

Advertisements, fingerprints, documents and letters are radiophotographed by RCA Communications—as many as 2000 a month! Even musical scores—such as the new "Trio"

by the great composer Shostakovich—are sent by faster, error-proof radiophoto.

RCA has long been a pioneer in all fields of international communications. Progress is constantly maintained by scientific research . . . research that is reflected in all RCA products.

When you buy an RCA radio, or television set, or Victrola—made exclusively by RCA Victor—you enjoy a special pride of ownership in knowing that you possess one of the finest instruments of its kind that science has yet achieved.

1945—London to New York—7 minutes

1926—New York to London—1 hr. 35 mins.

Notice the great improvement in clarity, as well as in speed—both results of RCA research. Radiophoto prints are no longer blurred by a "pattern." Today, they're about as clear and sharp as the original photograph snapped thousands of miles away.
