A SCIENCE SERVICE PUBLICATION

How old is she? How old is he?

Old for his age at 10?
Young in interest at 70?
(or any age between?)

An illustration from an article in CHEMISTRY describing models that show the Invisible World of ATOMS

Here is a **CHRISTMAS GIFT** that will please several on your list ---

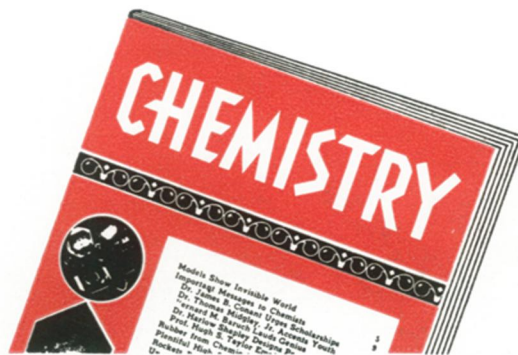

IT DOESN'T MATTER WHAT THEIR AGE in years may be, if they want to know *how* and *why*, give them CHEMISTRY for Christmas.

Coming once a month during 1946, CHEMISTRY will keep them informed on progress in plastics, on chemistry in relation to food, medicine, industry, and on atomic power.

Each month, CHEMISTRY suggests experiments (Chemical Things To Do) that can be done in one's own home. There is a Chem Quiz which is downright fun. The interesting new patents in the chemical field are described. There are articles by eminent contemporary scientists as well as excerpts from classics in chemistry of outstanding value today.

CHEMISTRY has pictures—lots of them. Photographs of people working in laboratories and industries, pictures of experiments, and of chemical products, and a cartoon to bring a smile.

CHEMISTRY is a pocket-sized, dramatic monthly. Subscriptions are \$2.50 a year for twelve issues. But since this is a Christmas gift, we will send the December issue of 1945 also to the person you name on the order coupon at the right—as our share in this Christmas giving of yours. And what's more, we'll send a Christmas card with your name on it, notifying him or her of your gift.

Gift from

C-919

MY NAME _____

STREET ADDRESS _____

CITY & STATE _____

Mail this order to **CHEMISTRY, 1719 N Street, N. W., Washington 6, D. C.** for a year's subscription.

- I enclose \$2.50 for the following.
 Please bill me after Christmas.
