

Letters To The Editor

Gently Optimistic

Congratulations on "Radioisotopes Cancer Aid" (SNL, Aug. 14, p. 99). Too few articles for lay consumption contain a paragraph such as the fourth one in that article. You are to be highly commended for inserting this and yet keeping a gently optimistic view of the cancer picture. Congratulations again.—S. F. Thomas, M. D., Palo Alto, Calif. *Thanks and we are glad to repeat that paragraph:*

No scientist would be foolhardy enough—or cruel enough to cancer victims—to hold out too much hope in individual cases. Nevertheless, the years of human life to be saved by future applications of radioisotopes promise to compensate many times over the loss of human life due to use of the atomic bomb in warfare—if the world can arrange not to use the atomic bomb as a weapon in the future.

No Freak This

I have the SNL, Aug. 21, with a picture of what looks like honey-comb on the cover. On page 26 I am informed that this is among the first pictures taken of molecules and that "each molecule is a sphere about four ten-thousandths of an inch in diameter." I got out a micrometer and set up on it .0004 and find that it is plainly visible to my unaided eye. I must be a freak.—Chas. C. Finn, Seattle, Wash.

Sadly we must tell you that we relied on a statement from the International Congress on Crystallography. Since checking with Dr. R. W. G. Wyckoff, who took the picture, we were informed that each little dot is approximately one-millionth of an inch in diameter.

Bison on Goering's Estate

I have seen European bison in museums

and also I saw a herd in June, 1938, at Goering's country estate some 40 miles from Berlin. They had some wisent bulls and they were breeding them with American cow bison. Whether any of the cows were pure wisent, I don't know. The wisent I have seen have been, generally speaking, smaller than the American bison and they had longer horns. Your picture (SNL, Aug. 21) seems to me to have horns longer in proportion than those of the American bison; also the shaggy mass of hair over the shoulders is less heavy than the American bison.—Godfrey L. Cabot, Boston, Mass.

Mankind's Salvation?

I read with surprise Mr. Vogt's plan for the salvation of mankind (SNL, Aug. 21, p. 118). He would save mankind by consistently reducing its numbers until there would be nobody left. What would he do then with the soil he would have consistently enriched and conserved? A better plan would be a program of educating those people who are denuding their soil to conserve and enrich it to a better and more efficient production as we are doing here in parts of the United States. Think of the possibility of being without Mr. Vogt himself if his parents had not responded to the powerful drives he speaks about that resulted in his being.—Judge Francis B. Allegretti, Elburn, Ill.

Fact Compilations Suggested

Every so often I go back to SNL, June 19, and again read with renewed interest "Laws of Matter Up-To-Date" by Helen M. Davis. To me this five-column article is a marvel of compact, useful, complete and important information the equal of which I have not seen elsewhere.

This suggests similar articles on various subjects that present themselves; for instance, the field of radiation from cosmic rays to the longest radio rays and everything in between, the elements arranged by number with their isotopes, and astronomy might be similarly treated. May we hope for something along these lines?—George W. Funck, M. D. (Retired), Englewood, Florida.

Others are in preparation, thanks. Our "Periodic Table of the Elements" 10" x 15" chart reprinted from December 1947 CHEMISTRY, a Science Service publication, is available at 25 cents each, 10 copies for \$1.00.

SCIENCE NEWS LETTER

Vol. 54 SEPTEMBER 11, 1948 No. 11

56,400 copies of this issued printed.

The Weekly Summary of Current Science, published every Saturday by SCIENCE SERVICE, Inc., 1719 N St., N. W., Washington 6, D. C., NORth 2255. Edited by WATSON DAVIS.

Subscription rates: 1 yr., \$5.50; 2 yrs., \$10.00; 3 yrs., \$14.50; single copy, 15 cents, more than six months old, 25 cents. No charge for foreign postage.

Change of address: Three weeks notice is required. When ordering a change, please state exactly how magazine is now addressed. Your new address should include postal zone number if you have one.

Copyright, 1948 by Science Service, Inc. Reproduction of any portion of SCIENCE NEWS LETTER is strictly prohibited. Newspapers, magazines and other publications are invited to avail themselves of the numerous syndicate services issued by Science Service. Science Service also publishes CHEMISTRY (monthly) and THINGS of Science (monthly).

Printed in U. S. A. Entered as second class matter at the post office at Washington, D. C., under the act of March 3, 1879. Established in mimeographed form March 18, 1922. Title registered as trademark, U. S. and Canadian Patent Offices. Indexed in Readers' Guide to Periodical Literature, Abridged Guide, and the Engineering Index.

Member Audit Bureau of Circulation. Advertising Representatives: Howland and Howland, Inc., 393 7th Ave., N.Y.C., Pennsylvania 6-5566 and 360 N. Michigan Ave., Chicago, STate 4439.

SCIENCE SERVICE

The Institution for the Popularization of Science organized 1921 as a non-profit corporation.

Board of Trustees—Nominated by the American Association for the Advancement of Science: Edwin G. Conklin, Princeton University; Karl Lark-Horowitz, Purdue University; Kirtley F. Mather, Harvard University. Nominated by the National Academy of Sciences: Harlow Shapley, Harvard College Observatory; Warren H. Lewis, Wistar Institute; R. A. Millikan, California Institute of Technology. Nominated by the National Research Council: Hugh S. Taylor, Princeton University; Ross G. Harrison, Yale University; Alexander Wetmore, Secretary, Smithsonian Institution. Nominated by the Journalistic Profession: A. H. Kirchofer, Buffalo Evening News; Neil H. Swanson, Baltimore Sun Papers; O. W. Riegel, Washington and Lee School of Journalism. Nominated by the E. W. Scripps Estate; H. L. Smithton, E. W. Scripps Trust; Frank K. Ford, Evansville Press; Charles E. Scripps, Scripps Howard Newspapers.

Officers—President: Harlow Shapley, Vice President and chairman of Executive Committee: Alexander Wetmore, Treasurer: O. W. Riegel, Secretary: Watson Davis.

Staff—Director: Watson Davis. Writers: Frank Thone, Jane Stafford, A. C. Monahan, Marjorie Van de Water, Martha G. Morrow, Ron Ross, Lydia Schweiger. Science Clubs of America: Joseph H. Kraus, Margaret E. Patterson. Photography: Fremont Davis. Sales and Advertising: Hallie Jenkins. Production: Priscilla Howe.

Question Box

CHEMISTRY

What advantages are credited to a new insecticide? p. 163

What role are growth-regulating chemicals expected to play in the future? p. 166

DENTISTRY

What facts were revealed in a survey on toothbrushes? p. 168

GENERAL SCIENCE

How would rebuilding the textile industry aid Japan? p. 172

Photographs: Cover, p. 163, Fremont Davis; p. 165, American Red Cross; p. 167, General Electric Research Laboratory; p. 171, Atomic Energy Commission.

MEDICINE

How may painless injections be given in the future? p. 169

What new technique is aiding infants with clubfeet? p. 166

What work is being done with the new anti-polio drug? p. 165

NUCLEAR PHYSICS

What is delaying the use of atomic power in industry? p. 170

PHYSICS

Where will the world's most powerful linear accelerator be built? p. 169
