Election returns telecast by NBC will be seen by television's ever-increasing audience.

See History in the making—on Television

Thirty years ago, to get election results, people waited for the morning papers . . . or election "extras." Then came radio! In 1920 election returns were broadcast for the first time.

Now television arrives as a star "reporter" . . . making you an eye witness of politics as it is practiced . . . of history as it is made . . . of the news as it happens!

In the world's largest television newsroom, RCA image orthicon cameras will watch the incoming

returns. State-by-state results will be telecast with the speed of light to be viewed—sharply, clearly—on the screens of more than 500,000 television receivers.

You will see the candidates when they appear, in person or on newsreels. In fact, more people will see them by television on this election night than saw Lincoln during his entire four years in the White House!

More than forty million people live within the areas now reached

by regular television programs. Pioneering and research at RCA Laboratories, coupled with RCA "know-how" in engineering, production and broadcasting, have contributed greatly to bring this new service to the American people.

When in Radio City, New York, you are cordially invited to visit the radio, television and electronic wonders at RCA Exhibition Hall, 36 West 49th Street. Free admission. Radio Corporation of America. RCA Building, Radio City, N. Y. 20.
