A SCIENCE SERVICE PUBLICATION

\$5.50 A YEAR

VOL. 60 NO. 13 PAGES 193-208

"... stimulated the interest of entire school"
 "... gives students a goal"
 "... encourages original creative work"
 "... best thing the newspaper could have done"
 "... terrific, sincere newspaper interest"

Extravagant? No, actual excerpts from many complimentary letters received from finalists in the Second National Science Fair

and now the

THIRD NATIONAL SCIENCE FAIR

WASHINGTON, D.C. • MAY 8-10, 1952

Below: Mary Helen Martin of Hyattsville, Maryland, and Peter Miller of St. Paul, Minnesota, winners of first awards.

Upper right: Barbara E. Joy of Warwick, Rhode Island, and Edmund Richards of Belleville, Illinois, winners of first awards.

At left: Group of young finalists on steps of the Monsanto Chemical Company, St. Louis, Missouri.

Local science fairs, stimulated by educators as inter-scholastic activities, inspire young students to excel in scientific projects.

Financial aid and promotional backing of area fairs is given by newspapers, educational foundations, civic and industrial organizations. The boys and girls making the best exhibits are selected for entry in the National Fair, conducted by Science Clubs of America, a Science Service activity.

Each finalist, upon arrival, receives a gold and silver medal suspended from specially-woven rainbow ribbon. Wonderful programs are planned for our young guests and they are given the opportunity to share in scientific awards to assist them in their chosen work.

Start your Science Fair NOW! We will tell you how . . . supply you with step-by-step information and give you personal assistance. Write to
