What
kind
of
men?

What kind of men are the 2500 scientists and engineers of Bell Telephone Laboratories?

They are men of many types, yet they work well together, for all have good minds as a foundation, years of study in the fundamentals of their science and in the methods of research and design. Vital, too, is their teamwork—for without the co-operation of many individuals the products of research and development could never be perfected.

Above all else these men have “the spirit to adventure, the wit to question, and the wisdom to accept and use.”

Such men can develop the world’s finest telephone systems—and have done so.

Perhaps there is a place among them for you. Write the Employment Director, Bell Telephone Laboratories, New York 14.
