SCOTT-MITCHELL HOUSE, Inc.

Dept. 2410 — 611 Broadway, New York 12, N. Y.

A special pre-publication offer to "scientists, painters,
poets, philosophers, engineers, businessmen,
teachers, tinkers"* and others—on the five new
SCIENTIFIC AMERICAN books

These are the 5 new
SCIENTIFIC AMERICAN
books

THE PLANET EARTH. Required reading in this International Geophysical Year. This book ignores the thin film of ever-changing animal and plant life on the Earth; it considers the forces, tides, and currents that stir our planet's core, crust, oceans, and atmosphere. 176 pages. Illustrated.

LIVES IN SCIENCE. Here the reader will meet two or three authentic giants, a hero or two, a saint and a rascal, sunny men of action, sour recluses, and a collection of eccentrics, prodigies and sages. Each man made his contribution to the 400-year history of science. 238 pages. Illustrated.

THE NEW CHEMISTRY. Current activity in the new chemistries of high speeds and temperatures, of "outlaw particles" and "free radicals," and rare earths, and of exquisitely sensitive analyses that detect an atom or two at a time. 244 pages. Illustrated.

PLANT LIFE. Plants furnish us with cheap and invaluable laboratory subjects for studying growth and form, genetics and evolution and the underlying chemistry of life—with its revolutionary impact upon agriculture and human nutrition. 256 pages. Illustrated.

THE UNIVERSE. How the two contending schools of modern cosmology (one of which believes that the universe is expanding) are putting their theories to the test of observation. 160 pages. Illustrated in gravure.

And here are the first 5
SCIENTIFIC AMERICAN BOOKS
(more than 40,000 of each
already sold)

AUTOMATIC CONTROL. About the mechanical "nervous systems" that make machines and factories regulate themselves.

ATOMIC POWER. The peace-loving atom: how nuclear reactors will be used to light homes and turn the wheels of industry.

THE NEW ASTRONOMY. The birth and death of stars, red giants and blue dwarfs, double stars and solar systems, globular clusters, errant comets, interstellar dust, galaxies.

THE PHYSICS AND CHEMISTRY OF LIFE. Life is explained in terms of the structure and behavior of the molecules that make up cells and tissues. 270 pages. Illustrated.

A TWENTIETH CENTURY BESTIARY. A new look at the behavior of animals, from the language of the bee to curiosity in monkeys. 240 pages. Illustrated.

The brilliantly-acclaimed new series in which the world's leading scientists, writing in clear, non-technical language, report to the layman (and to their colleagues in other fields) news of the latest investigations on the frontiers of science.

SIMON AND SCHUSTER will shortly publish five new paperback books in the first science library of its kind. They are briefly described in the panel. Each book, superbly written, edited, and illustrated, gives a comprehensive view of new discoveries and conclusions in one major field of science.

Each book derives from articles that have appeared in *Scientific American Magazine*—the century-old periodical which, 10 years ago was, in the words of the *New York Times* "miraculously transformed by new hands into one of the most remarkable ventures in the history of scientific publication. Its roster of contributors reads like a Who's Who of contemporary science." The *New Yorker* has called it "without much doubt our most satisfactory link between the general public and the laboratory."

How a publishing experiment became an instant success

The first 5 SCIENTIFIC AMERICAN BOOKS were published last year.

They were an instant success. Over 40,000 copies of each have already been sold.

✎ The *Times* calls the series "a stimulating source of information and reflection" for the reader who is "curious to learn about himself and the world he lives in."

✎ The *Bulletin of the Atomic Scientists* wrote: "They are of interest not only to the non-scientist but to the professional who wishes to be au courant with the latest developments outside his specialization. One hopes *Scientific American* will be encouraged to expand its coverage with more books of this quality."

✎ And here are typical reactions from readers: New Orleans: "It almost literally opened a new world for me. I'm a sociologist and

knew nothing about any of the physical sciences. Intelligible, exciting." . . . A New York reader praises the attractive format—adding "but I would read this kind of writing on wrapping paper."

To these thousands of readers—as well as to thousands more who are about to discover SCIENTIFIC AMERICAN BOOKS for the first time, we are happy to present the five new books in the second series.

A special pre-publication offer

The new titles, described in the panel, will soon be off press. They are handsomely printed, and illustrated, bound in strong paper covers. A large first printing enables us to price these books (size 5½ x 8; 160 to 288 pages) at only \$1.45 each.

Readers who order the complete set of five, now, will be billed at only \$6—a saving of \$1.25 on the five books.
