THE VISIBLE MAN

Authentic laboratory model, accurately scaled to a convenient size which enables easy identification of the smallest organs such as glands, nerves, heart valves, veins, arteries, etc. The fully articulated skeleton is expertly sculptured so that each of the 206 bones is clearly defined and realistically textured. The skeleton is a complete unit in itself and can be separately handled.

Every internal organ is finely detailed and hand painted in accordance with accepted medical illustrations. The model is constructed so that each part can easily be removed to reveal what lies beneath. Reassembly is simple and can be done as often as desired.

Skeleton and organs are housed in a transparent "skin" which is artistically sculptured to show muscular detail and major blood vessels. A removable breastplate gives access to the internal organs.

This unsurpassed model compares favorably with others which cost hundreds of dollars, now used as teaching aids and reference material. At the modest price of \$19.95 this model is now within reach of every school, doctor, hospital, laboratory and student.
