### IT FLASH

### FREEZES MOTION!

Exciting experiences in research and photography are possible with the new Geniac® STROBOSCOPE.

Designed to flash a brilliant neon light at precisely controlled speeds from one flash per second to 250 f.p.s. The STROBOSCOPE actually makes motion freeze before your eyes when its flicker frequency equals that of the vibrating object.

Used together with fast film and fast lenses, the Geniac® STROBOSCOPE creates multiple images on one film, and thus is useful in ballistics studies.

Essential for the research lab, photographic amateur, school or serviceman who wants to discover the causes of erratic vibration or to measure frequency accurately. The STROBOSCOPE can also be used in the laboratory through a microscope to observe moving cilia, vacuoles, etc.

Versatile, exciting, low-priced and accurate, the Geniac® STROBOSCOPE is available in kit form and assembled, complete with instructions and experiment manual.

## A SCIENTIFIC INSTRUMENT OF HIGH CALIBER AT LOW COST!

There's an excellent reason why the 4-inch DYNASCOPE Reflector is now the instrument used, approved and recommended by more and more schools, colleges, planetariums and professional astronomers. It is the remarkable scientific accuracy and engineering balance built into this complete telescope — at an incredibly low price! If you were to purchase the parts and assemble them yourself, you would spend much more than the unheard of low price of this precision instrument. And in building your own telescope you could never hope to attain the accuracy and co-ordination of parts that have been engineered into the Dynascope.

The 4-inch parabolic mirror produces exquisite definition of all the bright planets and is fully capable of splitting close double stars. (Note: the 4-inch mirror gathers  $\frac{1}{3}$  more light than a  $3\frac{1}{2}$ -inch mirror!) Finished to exacting specifications and guaranteed to perform to the Dawes' limit of resolution for its size! A 4-inch parabolic mirror of such quality has only been obtainable in the highest-priced instruments up to now!

## PROOF OF SUPERIORITY

(On Request — we will send a list of noted institutions now using the 4" DYNASCOPE)

### TESTIMONIALS:

#### From An Observer

On clear "good-seeing" nights my Dynascope easily reveals the Alpine Valley and the Straight Wall on the Moon, as well as three peaks in the floor of the Plato ring plain. It will split the star Mizar into its major components clearly. It will separate Saturn's rings and show six bands on the face of Jupiter. Also it will project a two-foot diameter disk of the sun showing sunspots in vivid detail . . . as an Englishman might express it, "Dynascope optics are a little bit of all right."  
 —VICTOR W. KILLICK, in charge of Astronomical Observatory, Sacramento Junior College, Calif.

#### Many Years of Experience

. . . I have had many years of experience in astronomy, and as junior leader here in Atlanta I always recommend Dynascope.  
 —LEONARD B. ABBEY, Jr., Decatur, Ga.

#### Cannot Be Equaled

I still don't see how you can produce a parabolic mirror of this focal ratio at the price . . . Epsilon Lyra was quite easy . . . on the 130 power ocular. I was more than pleased when it resolved this double double as four tiny, sharp, brilliant gems . . . with the diffraction rings concentric and sharp.  
 . . . For the price you ask, I do not believe that it can be equaled in any way. The oculars are excellent, and the entire instrument shows careful workmanship. How you do it is beyond me.  
 —G. N. JOHNSTONE, Albuquerque, N.M.
