Three 33 1/2 rpm records plus a fully indexed manual of 850 essential clear phrases read in English then Hebrew, with pauses for you to repeat, read by native Hebrew speakers and written by the chairman, Hebrew Dept., U. of Wisconsin. Manual provides phonetic transcriptions of all phrases, tips on study methods and pronunciation. 60 pp. of extra vocabulary on native food, personal accessories, auto parts, road signs, etc. You will have at your fingertips all the phrases needed when traveling in Israel. Proven an effective, enjoyable way to learn a language, improve pronunciation, and refresh the memory. 3 12" 33 1/2 rpm records, manual. 883 The set **\$5.95**

HEAT AND ITS WORKINGS, Morton Mott-Smith

A very thorough elementary to middle-level coverage of all the important theories and attributes of heat, sensation of heat; heat measurements; effects of heat on solids, liquids, gases; Boyle's law; Gay-Lussac's law; specific heat; calories; BTU's; latent heat; real gases; change of state, pressure and heat; relations of heat to light; convection and conduction; and many other topics. Extremely clear, easily followed by readers with no technical training. Concise, accurate treatment draws upon related areas of physics to present a complete picture. One of the finest books explaining science we've ever encountered. Recommended to laymen from high school students to somewhat advanced students and teachers. 50 ills. 175pp. 978 Paperbd. **\$1.00**

VERSES AND DRAWINGS OF WILHELM BUSCH

Two volumes of the best of the droll, satiric, rollicking verses and penetrating pen and ink drawings of a master. Busch (1832-1908) is malevolent, jovial, even bloodthirsty as he attacks human foibles in his subtle light verse. The accompanying drawings are simple yet they depict complex physical movement and states of mind with stunning accuracy. Together, these two books form a unique collection of the work of a rare and wonderful artist whose verses have already passed into German folklore. Original texts printed alongside of new translations by H. Arthur Klein and M. C. Klein and other hands. HYPOCRITICAL HELENA AND OTHERS. x + 305pp. 184 Paperbd. **\$1.00**

MAX AND MORITZ AND OTHERS. 203pp. 181 Paperbd. **\$1.00**

STRING FIGURES AND HOW TO MAKE THEM, Caroline Furness Jayne

An ancient form of amusement, practiced in all parts of the world, is given a thoroughly modern treatment in this unusual and endlessly amusing book. Descriptions are simple and easy-to-follow, and each is accompanied by several clear drawings, illustrating each step in the process. 107 different figures in all. This is the only book in English that presents this material so clearly that the beginner of any age can make the figures without the aid of a teacher. Fun for everyone and a book of great interest to anthropologists and collectors of string figures, since it adds greatly to the knowledge of string games and their distribution among the peoples of the world. 950 illus. + 407pp. 152 Paperbd. **\$2.00**

CELESTIAL OBJECTS FOR COMMON TELESCOPES, Rev. T. E. Webb

The best guide available for the serious amateur astronomer and the specialist without access to large, professional equipment, in print after many years. Locates and identifies thousands of celestial objects that can be seen with home telescopes. Vol. One, SOLAR SYSTEM: introduction to the instrument; location information for moon, sun, meteors, comets, planets. Vol. Two, THE STARS: Nearly 4,000 stars, nebulae, clusters, double stars, located and described. Revised and expanded (1962) by Mrs. Margaret W. Mayall, President, Am. Assn. of Variable Star Observers. New index gives location of all objects for Epoch 2000. New selection of photographs, chart of Mars, quadrant map of the Moon. Total of 606 text pp. 917-8 Two vol. set, Paperbd. **\$4.50**

BATS, Glover Morrill Allen

The world's foremost authority on bats writes comprehensively on the life-cycle of this mysterious, fascinating animal. Concentrates on bat as a life-form, but there is sufficient material on physiology, classification, and anatomy to form a complete picture. Insectivorous, fruit-eating, true vampires and their habitats, wing structure and flight habits, location sense, diet, hibernation, enemies, social habits, etc. Especially interesting chapters on role of bats in folklore, superstition. A middle-level study that can be read with pleasure and profit both by zoologists and laymen with no background in the field. Very extensive bibliography. 50 illustrations. 368pp. 984 Paperbd. **\$2.00**

NEW Dover RELEASES!

AN ELEMENTARY INTRODUCTION TO THE THEORY OF PROBABILITY, B. V. Gnedenko and A. Ya. Khinchin

An introduction, no more: authors discuss the theory of probability for students having only a finite number of possibilities, holding math to the elementary level. Within the purposeful limits, this is a thorough, absolutely authoritative explanation. The meaning of probability, addition and multiplication of probabilities, the concept of conditional probability, Bayes's formula, Bernoulli's scheme and theorem, random variables, the Chebysev inequality, normal laws of distribution, distribution curves, many related topics. No other popular treatment covers so much material with the same degree of clarity and authenticity. New translation of revised (1960) Russian edition. xii + 130pp. 155 Paperbd. **\$1.45**

SIR ISAAC NEWTON: A BIOGRAPHY, Louis Trenchard More

The definitive biography of the greatest scientist the world has known, compiled from both his published and unpublished writings, letters, etc. Dr. More presents Newton not merely as a scientist but as a whole person and brings to life the turbulence of Newton's England. A brisk, vivid narrative of Newton's surprisingly varied career plus concise, intelligent discussions of his major contributions to science and math: discovery of binomial theorem and the elements of differential calculus, theory of light, work in celestial mechanics, invention of reflector telescope, discovery of universal gravitation, etc. A must for all those interested in origins of modern science. xii + 675pp. 579 Paperbd. **\$2.50**

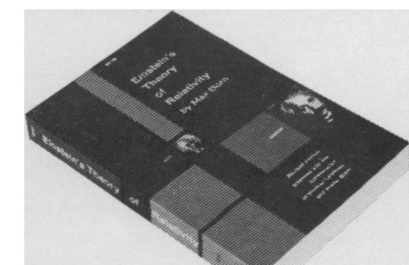

THE DOVER OPERA GUIDE AND LIBRETTO SERIES

The handiest books ever published for music lovers. Each volume provides everything (except music) needed for thorough understanding and enjoyment of favorite operas: full libretto, with all repeats; new, close English translation in facing columns, printed in large, clear type; plot and action summary; composer's sources, background material, performance history; biographies of composer, librettist, others; musical themes of major arias; pictorial section (composer, librettist, performances, famous roles, facsimiles of mss., etc.). Now ready:

LA BOHEME BY GIACOMO PUCCINI, by Ellen H. Bleiler. 63 illus. 150pp. 404 Paperbd. **\$1.00**
AIDA BY GIUSEPPE VERDI, by Ellen H. Bleiler. 76 illus. 181pp. 405 Paperbd. **\$1.00**

THE PHYSICS OF MUSIC, Alexander Wood

Late Fellow of Emmanuel College, Cambridge, discusses the physical aspect of music in a non-technical presentation that may be followed easily by any intelligent reader. The nature of sound; forced vibration and resonance; intensity and loudness; pitch; the physiology of the ear; tone production by strings, organ pipes, flutes and reeds, brass, percussion, and the human voice; history and techniques of recording and reproducing sound; acoustics and design of concert halls, with analyses of typical buildings, etc. Appendix contains mathematical material. A book of special interest to hi-fi enthusiasts, musicians, sound engineers, and anyone seriously interested in music. Revised, 1962, J. Bowsher. 109 illus. xii + 255pp. 322 Paperbd. **\$2.25**

EINSTEIN'S THEORY OF RELATIVITY, Max Born

One of the most important books we've ever published! The new, 1962, thoroughly revised and enlarged edition of a basic work, written by a Nobel Laureate (1955). Non-technical review of classical physics introduces up-to-date exposition of Einstein's theories of relativity. Amazingly clear, careful discussions of the concept of simultaneity, kinematics, Einstein's mechanics and dynamics, relativity of arbitrary motions, principle of equivalence, geometry of curved surfaces, space-time continuum, etc. Essential reading for scientists, yet accessible to the interested layman regardless of background. Revised by Dr. Born, with Dr. Gunther Leibfried and Dr. Walter Biem. 143 figs. 376pp. 769 Paperbd. **\$2.00**

ERROR AND ECCENTRICITY IN HUMAN BELIEF, Dr. Joseph Jastrow

Thought-provoking, entertaining survey of classic cases of fraud and folly by the late President of the Am. Psych. Assn. Includes stories of talking horses; fake prophets; documents signed by the devil; numerology; Jaeger's soul-retaining underwear; Patience Worth; psychograph; Taxil, greatest hoaxer of all time; Eusapia Palladino; the Versailles incident, as 2 ladies leave the 20th century and visit Marie Antoinette; Annie Besant; and many other lunacies, crank theories, frauds, charlatans, tricksters, and learned idiots. The gullibility of the human race summed up in an engrossing book that is interesting as well as enlightening. 57 illus. 408pp. 986 Paperbd. **\$1.85**

PROBABILITIES AND LIFE, Emile Borel

One of the leading French mathematicians of the last 100 years applies certain of the results of the math of probability to a number of problems that directly concern us all: computation of life expectancy tables, probabilities of job accidents, games of chance, chances of recovery from various illnesses, weather predictions, and other such matters. Rather than attempting to cover the whole field, he concentrates on problems that involve everyday situations, emphasizing the results, not the processes of math of probability. Simply written, free of technical terminology, this is a book that is entirely comprehensible to laymen and a fine introduction for anyone entering on a study of probability. 87pp. 121 Paperbd. **\$1.00**

SATELLITES AND SATELLITE RESEARCH, Desmond King-Hele

Newly revised, up-to-the-minute study makes available to laymen and to scientists a full, easily followed account of every significant aspect of satellite research, both Russian and Western. This is the only integrated picture of satellites, their mechanisms, and discoveries made with them. Fingerpaths, disturbances of orbits, communication with satellites, history of launchings (date, size, weight, speed, orbit, equipment, life expectancy, etc.), detailed discussion and evaluation of discoveries (Van Allen belts, earth measurements, temperatures in space, cosmic rays, etc.). New 45-page chapter covers "Recent Developments" to September, 1961. Expert analyses, written with unusual skill. 61 illus. 228pp. 703 Paperbd. **\$2.00**

SACRED BOOKS OF THE EAST

Probably the most valuable printed source for study of the basic Eastern writings. This monumental series, prepared by the late Max Mueller and his colleagues, contains the standard scholarly translations of the authentic texts, some the only renderings ever made into English. Augmented by full, careful explanatory introductions, textual notes, appendices. Now ready!
