336. ALGEBRAIC CURVES, Robert J. Walker. Full introduction to study of algebraic geometry by way of recently developed methods of handling problems. Includes material on algebra, geometry needed to follow the text. 201pp. Paperbd. \$1.60

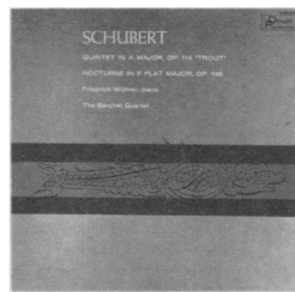

917-8. CELESTIAL OBJECTS FOR COMMON TELESCOPES, T. W. Webb. Newly revised ed. of a classic handbook for serious hobbyists, professional astronomers without access to large equipment. 4,000 objects identified, located; tips on use of equipment, etc. Total of 606pp. 2 vol. set. Paperbd. \$4.50

301. STATISTICAL ASTRONOMY, R. J. Trumpler, H. Weaver. The standard presentation of statistical techniques applied to astronomy. Introduction to statistical theory, detailed review of major current uses in descriptive astronomy, correcting observational errors, etc. xxi + 644pp. Paperbd. \$3.00

258. AN INTRODUCTION TO MATHEMATICAL PROBABILITY, J. L. Coolidge. A thorough, scientifically-sound introduction to an increasingly important subject. Wide variety of applications covered. No math beyond elementary calculus. 214pp. Paperbd. \$1.35

152. STRING FIGURES & HOW TO MAKE THEM, C. F. Jayne. The basic work on an important, entertaining amusement. Cat's cradle, scores more, all diagrammed in crystal-clear drawings, from Apache, Eskimos, Europeans, etc. 440pp. Paperbd. \$2.00

Announcing an exciting new venture . . . Superb recordings of fine classical music, direct to you exclusively from dover!

Dover Publications announces a new development in the field of recorded classical music. We are making available directly to you superb 33 1/3 rpm monaural recordings of culturally significant music by major composers of all periods—at the phenomenally low price of only \$2 per record! These same recordings (with the exception of the previously unreleased Gimpel recording of Bach) were originally sold under a major label for \$5 and \$6 apiece. They were dropped from the catalogue because they could not match the sales of the few "best-sellers." We felt, however, that there were many music lovers interested enough in this fine music to warrant keeping it in circulation. Because we are experienced in the business of mail order, we were able to select the finest master tapes available, make brand new pressings on top-quality vinyl, produce all-purpose records that sound equally well on hi-fi and stereo equipment, guarantee them to be crackle-free and whir-free, and still offer them at an unbeatable price.

Here is the chance of a lifetime to build up your record collection with major pieces by Mozart and Bach, modern composers like Stravinsky and Bartok, Baroque music by Telemann and Geminiani, Romantics like Schumann and Schubert. Order as many as you wish and whichever titles you wish. This is not a club and you are under no obligation to buy others at higher prices in order to get the few you may want at \$2 each. Nor are these close-outs or remainders. They are all brand new records, and Dover's money-back guarantee assures you that your full purchase price will be refunded without question should you be dissatisfied. In fact, we are willing to return your money if the quality of the sound or even if the music, itself, fails to live up to your expectations. Now available:

- HCR 200. MOZART:** String Quartet in A Major, K.464; String Quartet in C Major ("Dissonant") K.465. Barchet Quartet. \$2.00
- HCR 201. MOZART:** Quartets in G Major, K.80; D Major, K.155; G Major, K.156; C Major, K.157. Barchet Quartet. \$2.00
