# 3 DIFFERENT EXCITING CREATIVE SCIENTIFIC KITS

PERFECT GIFTS FOR THE BRIGHT YOUNGSTER\* WITH THE INQUIRING MIND... & HIS DAD, TOO!

\*Ages 12 to 17

Berkeley Scientific Kits are based on advanced scientific principles . . . are miniaturized, full-performance kits and machines—not toys. They're educational, stimulating, easy and fun to build and fascinating to use. Each kit has all necessary parts and complete manuals by Edmund C. Berkeley describing scores of experiments. These kits were invented and designed by Edmund C. Berkeley, a leader in the computer field, mathematician, actuary, maker and developer of small robots, editor and publisher of the magazine "Computers and Automation," author of numerous books including "Giant Brains" (Wiley, 1949) and "The Computer Revolution" (Doubleday, 1962).

# How to extend Christmas

THE WHOLE YEAR THROUGH

FOR THE MOST UNUSUAL PERSON  
ON YOUR CHRISTMAS  
LIST

Wouldn't he (or she) like a gift of twelve packages, one to arrive each month in 1965?

## Twelve Surprises One each month for a year

IN EACH 1965 monthly gift package, there will be several objects of science to be handled, looked at, experimented with, and owned by you. Included will be sheets of explanation which give the interesting details of discovery, of development, of manufacture; and tell how to perform unusual experiments with the contents of the package.

Since late in 1940, packages like these have been going forward to members of the THINGS of science group. Glance over this list, then decide whether a membership, which brings monthly packages on subjects as widely varied as these, isn't just the thing for that most unusual person on your Christmas Gift list.
