Revolutionary Technological Breakthrough in LIVING UNDER WATER

Underwater Ant Nest Used to Dramatize Development
Sensational new development may be forerunner to underwater cities, the day man will live under the sea. Silicone Rubber Membrane enables ants (and other creatures) to live and breathe normally by obtaining life giving oxygen from water even though ant nest is submerged and sealed off completely from atmosphere. When ants consume oxygen in nest, pressure decreases below that of oxygen pressure in the water—allow oxygen from water (but not water) to pass through membrane. When carbon dioxide pressure increases inside nest it passes out through membrane. 3" x 5" membrane (.001" thickness) is bonded to dacron mat for mechanical strength and made exclusively, by hand craftsmen, for Edmund Scientific's experimental customers. Nest comes complete with sand, food, certificate to be returned for supply of ants. Complete instructions. Supply limited. Use your aquarium or order ours, listed below.
Stock No. 70,801-Q (Ant nest, membrane, instr.).....\$8.75 Ppd.
2 1/2 GALLON PLASTIC AQUARIUM
Stock No. 90,014-Q.....\$7.95 Ppd.
