## SHOW LIVING SPECIMENS... *brilliantly...clearly*

With its stage horizontal, the Bausch & Lomb Tri-Simplex Microprojector safely projects images of live specimens in liquid. The objectives are of microscope quality... made specifically for the Tri-Simplex... designed to project big, clear, detailed images. Microscope-type dovetail slide and rack and pinion make for easiest, most precise focusing. Microscope nosepiece assures instant, critical positioning. The condensing system provides maximum efficiency and contains a heat absorbing glass to protect the specimen.

Tri-Simplex is entirely "design-engineered" by Bausch & Lomb. The fully integrated optical system results in outstanding classroom performance.

It's simple to operate, too. Set it 10 feet from the screen—aim the big mirror and observe brilliantly projected images.

To get complete details on the Tri-Simplex, ask for Catalog 42-254. Write Bausch & Lomb, 26627 Bausch St., Rochester, New York 14602.
