

Gentlemen: If you purchase this shaver, we promise never to repair it.

But we will promise you this, and in writing: If anything goes wrong within one year we will send you an all-new ACCUMEN Shaver. After that one-year guarantee period, and if you are unhappy with the shaver for any reason, return it to us—even if it's thirteen years from now—and for just \$12.95 we'll send you the newest "top-of-the-line" model available at the time. (We fully realize that \$12.95 may be worth only \$2.95 thirteen years from now. But that's our hard luck). And then you can start this all over again with that new shaver—for another thirteen years if you wish. That's why we call it the "ACCUMEN LifeTime Shaver Plan."

If this sounds like an unprecedented offer, you are correct. It is. And if you think there must be some "gimmick" involved, you are also correct. There is. We would not stick our necks out so far and for so long if we weren't quite sure that the ACCUMEN will give you trouble-free satisfaction from now until the cows come home. What makes us so sure? Just this: We have observed the ACCUMEN's performance for years in Europe and since we introduced it to this country. We have talked to hundreds of really satisfied owners. We have "fan letters" by the score. Finally, we know what it's made of and how it's made. It will be a rare ACCUMEN that falters or disappoints.

This is the Ultimate Shaver — we think this is the finest shaver made in the world today. Cordless or otherwise. In our opinion it makes all others obsolete. Very few of our competitors describe their shavers as "second best," so we quite understand if you take all of these claims with a heaping spoonful of salt. But, here, for your consideration, are the principal reasons why we believe the ACCUMEN to be "The Ultimate."

1. The Powerplant: A high-potential nickel-cadmium battery, which will give you at least ten to fifteen good shaves before recharging. As an aside: The president of Witte & Sutor (manufacturers of the ACCUMEN) is none other than Herr Waldemar Witte, the inventor of the rechargeable flashlight. He ought to know!

2. The Motor: The "synchronesh" motor is a 6000 rpm. marvel of German engineering. Barium ferrite permanent magnets, self-lubricating bearings and copper-carbon brushes assure a long, hardworking life.

3. The Shaving Head: Shaving area 2½ times larger than that of any other rotary shaver. Ultrathin foil (.00315"). Four stainless steel cutters are individually sprung and balanced and can operate independently to adapt to the minutest contour of your face (this is a truly radical innovation—have you ever noticed how your present shaver is built on the same principle as a lawn mower?)

And then the marvelous extras: The patented "LumiRing" that spotlights the working area for perfect shaves in any light. Vacuum action that keeps your whiskers from your clothing. And, as far as we know, this is the only shaver in the civilized world that is rechargeable directly from any wall socket—no transformers, no "power cords." The ACCUMEN is lockable, to keep it exclusively yours (sorry, teenagers). Then, there is a built-in shave counter. Last, and probably least, women are wild about the ACCUMEN, because the shaving head is round and smooth and has no sharp edges. (But, please, buy her one of her own.)

Still more. The ACCUMEN is not just the finest shaver in the world. The optional attachments make it a complete grooming system — among other things. Look at the choice in the coupon and help yourself.

Should you Buy a Shaver by Mail — Sight Unseen? It may be unorthodox, but the only way to buy this shaver at this price (on this side of the Atlantic) is from us, the exclusive importer/retailers. Be that as it may—why not? What's the risk? You order the ACCUMEN not only with the one-year new-shaver guarantee; not only with the \$12.95 ACCUMEN LifeTime Shaver Plan, but with this added assurance:

Unconditional Promise: Try the ACCUMEN for two weeks. Then, if you don't agree it is indeed "The Ultimate," send it back to us and we'll return your money by air mail and write you a nice thank-you letter.

That's it. For the price of an ordinary, run-of-the-mill shaver you can now shave with the pride of Europe. The ACCUMEN. The Ultimate Shaver. The only electric shaver that shaves close enough (in the woods or at home) to satisfy "blade men." And the only shaver in the world that will never be repaired, but that offers the exclusive ACCUMEN LifeTime Shaver Plan.

SPACE

Gemini 11 Pictures Fantastically Clear

See Front Cover

➤ GEMINI 11's photographs of the earth were so clear, and were taken from so far away (as high as 850 miles) that they almost look like advertisements for a globe.

This week's cover is a perfect case in point. The camera is looking northeast at India, with the Western Ghats Mountains running diagonally across the picture on the west coast. At the lower right is the Gulf of Mannar, bounded by India and the island of Ceylon, which reaches south to within about six degrees of the Equator. Among the countries that make up the horizon are Pakistan, Nepal, China and Burma.

At the very top left corner of the photo a faint grey smudge is all that is visible of the mighty Indus River, stretching 1,900 miles down through Pakistan to the Arabian Sea. Just below it is a slightly larger, darker smudge called the Gulf of Kutch, and to the right of that, the Gulf of Cambay.

At the lower left, Gemini 11's antenna is visible and the docking sight stretching up from it.

There remains one more Gemini flight to add to the picture gallery, but it will probably not go so high.

(Cover photograph by NASA.)

GENERAL SCIENCE

Canada Goes Shopping For Tons of Uranium

➤ CANADA's Atomic Energy Control Board is shopping for uranium fuel to run future nuclear electric power stations in Ontario.

Bids have been requested to supply 5,500 tons of uranium fuel either in raw form from the mine, or refined as uranium oxide. Some 1,100 tons are needed for delivery up to 1973, and 5,500 tons up to 1980.

Plans call for the addition of about 500,000 kilowatts of nuclear capacity per year between 1970 and 1980.

The first two units of the 1,080,000-kw nuclear plant at Pickering, 20 miles east of Toronto, are scheduled for operation in 1970. Initial fuel loading of the first reactor is 116 tons of uranium oxide.

Capacity of the plant will probably be expanded to 2,160,000 kw, and if approval from the Atomic Energy Control Board can be obtained the plant could reach a capacity of more than 3,000,000 kw.

A reactor at Douglas Point, Canada's first full-scale nuclear plant, is scheduled to go into operation at the end of this year. It was built by Atomic Energy of Canada Ltd. in cooperation with Ontario Hydro and has a capacity of 200,000 kw.
