

... To the Editor

mission report and may be able to accomplish something in this field by public exposure.

The report may not allude to the need for child guidance, but I feel there is good potential for fighting crime at the source—psychiatric counseling of mother and young child to educate and achieve communication.

With best wishes, and keep up the good work.

Dear Sir:

I thought your article on I.T.A. (SN: 2/11) was very fine indeed. It was so clear, direct, and brief that it provides an excellent statement for any interested person.

I have been a subscriber to your publication for I do not know how many decades and have always found it very valuable reading. I think the new format which you adopted recently is a great improvement.

The only Theatre Organ available in kit form—for only \$1350.

You've asked for it and here it is — the NEW Schober THEATRE ORGAN that you assemble yourself. For the first time in kit form, a real Theatre Organ with that rich, full, old time theatre pipe organ sound. You create the organ, then you create the music!

For years you've been able to buy organs in kit form from Schober: The Recital (fully AGO), the Console II (the best spinet organ available today) and the Spinet (for the most music at the lowest price). Now to join them, we present the Schober Theatre Organ.

The Schober Theatre Organ has the same quality features found on all Schober Organs, and in addition... special voicing, curved console design, two 61-note keyboards, 2-octave radiating pedal clavier, 8 octaves of tone distributed over 5 pitch registers (including a 1-foot register!), 35 speaking organ stops, 8 realistic percussion stops, 4 couplers, and vibrato tablet—48 tablets in all. And all at a truly remarkable low price... you save over \$1,500 (well over 50%) from comparable theatre organs.

Easy Step-By-Step Instructions.

You'll enjoy assembling this authentic and versatile instrument from transistor and miniature components too. Just follow easy step-by-step instructions written in everyday language which anyone can understand. You'll have an unequalled pride when you're finished that only can come from assembling it yourself.

And you'll have an organ you can learn to play easily and quickly—just follow one of the self teaching courses available from us.

The Theatre Organ price starts at \$1,350, depending on the options you select. This price includes a beautiful walnut console (other woods available) or you can save an additional amount by building your own from plans available from us. Options available include combination action, genuine reverberation, percussion, and amplifiers and speakers.

THE Schober Organ CORPORATION
43 West 61st Street, New York, N.Y. 10023

A COMPLETE THEATRE ORGAN!

All you do is have the fun of assembling it from kits and detailed, step-by-step instructions.

Includes console, keyboards, bench, pedals, electronics—everything you need except amplifier and speaker system, which are extra—or use your own. Percussions, combination action, and reverberation are options.

Features fully transistorized electronics, regulated power supplies, all printed circuit construction and gold switch contacts.

Combination Action Ten buttons select preset combinations of stops—actually move the stop tablets as in fine pipe organs—to give instant total changes of tonal effects. You can alter the preset combinations any time you like. Action is brand new electro-pneumatic type — silent, dependable.

Percussion Eight percussion stops provide exciting realism. Celesta, harpsichord, piano, mandolin, xylophone, chrysoglott, orchestral bells, single or reiterating, are played just like the real thing—and sound that way—alone or along with regular organ stops.

Uncompromising Organ Quality from Easy-to-Assemble Kits

Free Information. Send today for your free copy of Schober's 16-page full-color booklet—plus free 7" recording—with full information on all Schober Organs, priced from \$550.

The Schober Organ Corp., Dept. SN9
43 West 61st St., New York, N. Y. 10023
