

# New Ideas and Gadgets

New Ideas and Gadgets is an editorial service to readers; more information on items can be secured from the manufacturers.

## Ultrasonic Disintegrator

High yields of cellular extractions are obtained from bacteria, protozoa, yeast or blood cells by this ultrasonic instrument. To use, the tip of its titanium probe is inserted into the beaker or test tube containing the specimen. Automatically controlled, it can also homogenize and emulsify biological material.

Edison Instruments Inc.,  
54 W. Cherry St., Rahway, N.J. 07065

## Plastic Hammer

Designed for jobs where metal hammers could damage the surface, this mallet-shaped hammer made of lightweight, impact-resistant plastic is especially useful for aligning extractors of molds, where even slight marring marks the finished product. The hammer comes in several sizes.

Public Relations Dept., Du Pont and Co.,  
Wilmington, Del. 19898

## Flexible Laboratory Arm

Optical instruments, laboratory apparatus and specimens can be held securely at convenient angles with this flexible arm that will support five pounds. A micrometer adjustment allows precise positioning. The unit is available with or without a pushbutton magnetic base for one-hand operation.

Flexbar Machine Corp.,  
P.O. Box 159, Plainview, N.Y. 11803

## U. V. Photo Cabinet

Color or black and white photographs of fluorescent chromatograms invisible in ordinary light can be readily made in this portable cabinet designed for ultraviolet photography. The lens of the camera is inserted into the foam plastic viewing aperture.

Ultra-Violet Products Inc.,  
5114 Walnut Grove Ave.,  
San Gabriel, Calif. 91778

## Tennis Racket Grip

More comfort and less fatigue is provided to tennis players by the use of this racket replacement grip that absorbs shock and hugs the hand, making a vise-like grip on the handle unnecessary. The soft grip reduces the chance of blisters forming, especially on the hands of the infrequent player. It is easily installed on any racket.

Superior Sports Specialties,  
558 Library St., San Fernando, Calif. 91341

## New Electric Generator

Ocean movements power this simply designed electric generator that operates under water and requires little attention. Consisting of a system of floating canisters that move like pistons to produce the electricity, the generator can be built in sizes from small portable units to large installations for industrial sites and cities.

Mobile Towers and Cranes Co.,  
P.O. Box 464, Alhambra, Calif. 91802

## Shipping Containers

Time, labor and money are saved for shipowners by the use of these large, corrugated easy-to-assemble containers that hold either bulk materials or a number of packages of different shapes and sizes. The shipping chests, uniform in size, 60 by 38 by 50 inches, stack conveniently and economically and are reusable for storage.

Olin Mathieson Chemical Corp.,  
460 Park Ave., New York, N.Y. 10022

The only Theatre Organ available in kit form — for only \$1350.

You've asked for it and here it is — the NEW Schober THEATRE ORGAN that you assemble yourself. For the first time in kit form, a real Theatre Organ with that rich, full, old time theatre pipe organ sound. You create the organ, then you create the music!

For years you've been able to buy organs in kit form from Schober: The Recital (fully AGO), the Console II (the best spinet organ available today) and the Spinet (for the most music at the lowest price). Now to join them, we present the Schober Theatre Organ.

The Schober Theatre Organ has the same quality features found on all Schober Organs, and in addition... special voicing, curved console design, two 61-note keyboards, 2-octave radiating pedal clavier, 8 octaves of tone distributed over 5 pitch registers (including a 1-foot register!), 35 speaking organ stops, 8 realistic percussion stops, 4 couplers, and vibrato tablet—48 tablets in all. And all at a truly remarkable low price... you save over \$1,500 (well over 50%) from comparable theatre organs.

### Easy Step-By-Step Instructions.

You'll enjoy assembling this authentic and versatile instrument from transistor and miniature components too. Just follow easy step-by-step instructions written in everyday language which anyone can understand. You'll have an unequalled pride when you're finished that only can come from assembling it yourself.

And you'll have an organ you can learn to play easily and quickly—just follow one of the self teaching courses available from us.

The Theatre Organ price starts at \$1,350, depending on the options you select. This price includes a beautiful walnut console (other woods available) or you can save an additional amount by building your own from plans available from us. Options available include combination action, genuine reverb, percussion, and amplifiers and speakers.

THE *Schober Organ* CORPORATION  
43 West 61st Street, New York, N.Y. 10023

### A COMPLETE THEATRE ORGAN!

All you do is have the fun of assembling it from kits and detailed, step-by-step instructions.

**Includes** console, keyboards, bench, pedals, electronics—everything you need except amplifier and speaker system, which are extra—or use your own. Percussions, combination action, and reverberation are options.

**Features** fully transistorized electronics, regulated power supplies, all printed circuit construction and gold switch contacts.

**Combination Action** Ten buttons select preset combinations of stops—actually move the stop tablets as in fine pipe organs—to give instant total changes of tonal effects. You can alter the preset combinations any time you like. Action is brand new electro-pneumatic type — silent, dependable.

**Percussion** Eight percussion stops provide exciting realism. Celesta, harpsichord, piano, mandolin, xylophone, chryso-glott, orchestral bells, single or reiterating, are played just like the real thing—and sound that way—alone or along with regular organ stops.

### Uncompromising Organ Quality from Easy-to-Assemble Kits

**Free Information.** Send today for your free copy of Schober's 16-page full-color booklet—plus free 7" recording—with full information on all Schober Organs, priced from \$550.
