*If there is a power failure
on your wedding day will you
get to the church on time?*

If you own the new **STARTONE** CLOCK/RADIO you'll not only not miss your wedding but you will be on time for any other important engagement any morning of the year! **STARTONE** is first to have *both* radio and alarm clock battery-powered which makes you independent of power failures, accidentally pulled cords or not setting an alarm.

The 6 transistor **STARTONE** radio has full-band AM, with reception and tone so clear it is hard to believe it comes from such a streamlined, compact unit. The clock has a movement of almost chronometer accuracy. Set the control to "Alarm" and you will be awakened by your favorite program. A clever twist: on the "Alarm" position the radio shuts itself off after 45 minutes. Never worry about leaving the house with the radio on! Greatest convenience of all: If you arise at the same time each day just keep it on this position and you'll never have to remember setting the alarm or worry about forgetting it. It will automatically come on and shut off again every single morning. Or — use this feature to doze off to music at night.

All this powered by 3 flashlight batteries that will last a year. The modern good-looks, elegant finish in chic "cafe au lait" color and chrome trim make the **STARTONE** an attractive addition to any room. Small enough (6¼" x 5½") and light enough to fit in picnic basket or suitcase.

Write: 526 Washington Street, San Francisco, Calif. 94111 • Phone: (415) 981-5688

Send me the **STARTONE** with batteries and earphone. I enc. \$40.95 (\$39.95 plus \$1 for post. and ins.) Calif. resid. add \$2 tax. Refund if not delighted.

From Abbott Laboratories . . .

Pioneer in Radio-Pharmaceuticals,

Radioisotopes for School Laboratory Experiments

Abbott will produce on order a choice of two kits suitable for student use to permit a wide range of experiments.

The radioisotope quantities in these kits are generally licensed by the Atomic Energy Commission and no by-product license is required.

For an order form and bibliography of literature describing various experiments that may be made with these kits fill out and mail this coupon.
