WORLDWIDE WEATHER

Letter from Ottawa
new science body

- 175 Tribal mystery in Colombia
- 176 Moonrocks: more data, more controversy
- 177 Keeping up with technology
Psychologists seek relevance
- 178 Environment: doing what is possible
- 172 **Physical Sciences:** Partial superconductivity confirmed; Semiconductor is photosensitive; Radiation detected from Josephson junctions; Counteracting thermal fluctuations; Small particles differ from bulk samples
- 183 **Behavioral Sciences:** Most complete Homo habilis skull; Censorship worse than pornography; Progress of school desegregation; Cigarette ads lack influence; Children attracted to opposite sex
- 184 **Natural Sciences:** Insecticides studied; Antibodies signal nutrition; Aged Sequoias victims of winter; Scanner solves lizard's secret; Holography for biologists; Botulism hits waterfowl

Before scientists can extend the length and improve the accuracy of weather forecasts, they need a global monitoring network, a better understanding of some crucial atmospheric processes, and extremely high-speed computers. The right combination for two-week forecasts appears to be about 10 years off. p. 185 (Photo: ESSA.)

Here is the most superb home librar

It may not be popular to admit it, but all people *aren't* created equal. And the longer they live (and learn), the less equal they get.

You were probably born with a bigger share of intelligence than most of your fellow men . . . and taught how to use it. And you appreciate the difference. You aren't ashamed of having brains. You enjoy using them.

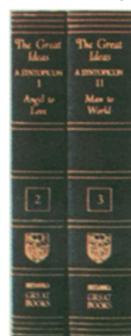

That's why Great Books belong in your home. These are the writings of Plato, Homer, Cervantes, Tolstoy, Freud, Rabelais, Shakespeare, and many more. They contain just about every important thought of Western man for the past 3,000 years! A set of 54 beautifully bound volumes containing 443 masterpieces by 74 of history's greatest geniuses.

The \$1,000,000 Syntopicon

With Great Books (and available only with Great Books) is a unique reference work called the Syntopicon, shown below.

Also available with the Great Books are the handsome 10-volume reading plans (illustrated above). And you may also get a remarkable 10-volume set called Gateway to the Great Books (shown on opposite page).

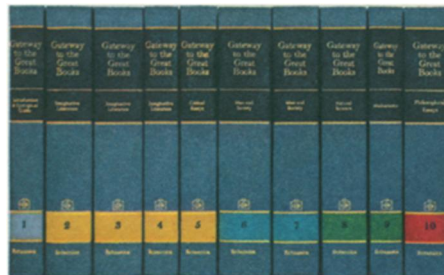

Great Books are published by Encyclopaedia Britannica in collaboration with the University of Chicago.

The amazing Syntopicon

The two-volume Syntopicon is the key that unlocks the treasure house of Great Books for you. Unlike a dictionary that indexes words, or an encyclopaedia that indexes facts, the Syntopicon indexes ideas—every one of the thousands of topics and subtopics within the Great Books. In minutes, the Syntopicon enables you to look up any idea in the Great Books and find what each of the great thinkers thought about it.
