The human fetus. Whether or not it may be aborted remains a moral dilemma. The legal question, however, is being settled in the courts. See page 75. (Photo: Carnegie)

ANCIENT EGYPT

Penetrate the secrets of the pyramid built them. Take **ANCIENT EGYPT**— as a guest of **TIME LIFE BOOKS**

Let TIME-LIFE BOOKS take you beyond the rigid death masks, the tombs, the unsmiling portraits that Ancient Egypt presents to history. Meet the Egyptians as they really were at the height of their splendor: a gay, romantic people who thought of death as only a door to another, equally happy life.

Start with The Great Pyramid of Gizeh, built of stone blocks weighing up to 15 tons apiece, fitted together as precisely as a necklace clasp. Learn how workmen sealed it off so effectively (from the *inside*) it took looters 400 years to gain entrance. Gaze at the statue of beautiful Queen Nefertiti . . . and see the 3,000 year old mummified head of Ramses II. (Now in a Cairo museum, Ramses arrived there after suffering the indignity of being taxed as dried fish by a befuddled customs inspector.)

The world's first united nation

The Egyptians wrote lyric poetry to lost loves; their doctors used sutures; they endured history's first recorded labor strike—and, blessed with a genius for organization, they formed the world's first united

nation more than 3,000 years before Christ. In *Ancient Egypt*, Lionel Casson, Professor of Classics at New York University, gives you an intimate view of a people whose span of accomplishment has few rivals in human history.

The GREAT AGES OF MAN Series
