

Does your colleague know something you don't know?

Check his pocket.

If you see a copy of "Current Contents" there, you can bet he does. That pocket-sized weekly publication reproduces the contents pages of every important journal published here or abroad in your field. All he has to do is scan *Current Contents* for comprehensive current awareness. If he sees something especially interesting, he sends off a card to us for original tear sheets of the article, or corresponds directly with the author, whose name and address is included.

Shouldn't you know as much as he does?

There are seven editions of *Current Contents*, one or more specifically in your field. Check the one(s) you're interested in and we'll send you a sample copy along with full details, including advantageous group and educational subscription rates.

**Current Awareness

A Science News reporter has two points of view.

Science News reporters are both scientific specialists . . . and experienced, exacting journalists.

From coast to coast and around the world they seek out up-to-the-minute, hard-fact news of current scientific happenings . . . and send it back to our Washington-based staff for expert editing. Our perceptive professionals contribute realistic evaluations and interpretations of occurrences in virtually every scientific and technical field . . . in-depth stories that provide the perspective . . . features and columns that emphasize what's new and significant in research, development, exploration and discovery. In addition, they supply us with pertinent photographs, diagrams, drawings, maps and other illustrative material.

You enjoy their two points of view.

Why not send a gift subscription to somebody else who will enjoy Science News as much as you do?

Simply fill out the coupon below and mail it to us. We'll take care of the rest.

Complete and send to: Science News, 1719 N Street, N.W.,
Dept. 126, Washington, D.C. 20036
