See "live" unstained organisms
through the one microscope
that offers
three different views...

and one low price.

This new AO microscope is built for multiple use—it's like having three microscopes in one. And, importantly, the AO Phase Contrast Teaching Microscope is priced within the range of your departmental budget. Phase contrast allows your students to view living unstained specimens, does away with the time and need for treating specimens, and the distortion caused by the staining process. The AO Phase Contrast Teaching Microscope also offers darkfield and conventional brightfield viewing. It's easy to use, requires virtually no adjustments and no accessories.

A multipurpose microscope, a practical way to put life in your classroom. The AO Phase Contrast Teaching Microscope. Ask your AO Representative about it or write for literature.

An Invitation
to participate in the
3rd annual Gustav Ohaus-
NSTA awards program

\$1000 First Prize / \$750 Second Prize / \$500 Third Prize

Honorable Mentions for Deserving Papers

Unlike any other Program presently administered by NSTA, The Gustav Ohaus Awards acknowledge only the innovative. (There are programs designed to recognize accomplishments, most notably the STAR Awards Competition.) William G. Ohaus summarized the intent of the Program in a paper delivered at the 1968 NSTA Convention: "to develop and encourage new ideas in the area of science education".

To state it another way, the Ohaus Awards Program is for the dream you cherish—your vision of science education, or any of its parts, as it should be.

Papers are judged by a panel of distinguished educators. Their decisions are governed by originality of thought and concept; clarity of expression; and suitability for publication.

To be eligible, you must spend at least 1/2 of your time teaching.

Won't you share your dream with us?

Closing date for submission is December 18, 1970. Awards will be presented at the National Convention in Washington, D.C., in March, 1971.

For official application forms, please circle the appropriate number on the reader service card. Correspondence regarding the program should be addressed to:
