"I'm sorry, but Mr. Morgan is no longer with us."

He left the company. For good. Like 25,000 other valuable employees who lost their lives last year in auto accidents.

Which has prompted a lot of businesses to set up the National Safety Council's Defensive Driving Course. A course that utilizes tested concepts and techniques of defensive driving that can dramatically reduce traffic accidents among your employees.

Western Electric has already trained hundreds of its employees how to drive and survive. So have other employee-conscious businesses like National Cash Register. Oklahoma Gas and Electric. And the Hartford Insurance Group.

You, too, will find it very profitable to set up your own Defensive Driving Course for your employees.

Because the best way to keep your workers working is to keep your workers alive.

Send for the survival course.

Osteoporosis, the fragile-bone affliction of the aged, up to now has been untreatable. Scientists are now fighting the disease with calcium infusions. See page 562. (Photo: Dr. Jenifer Jowsey)
