The ability to make a variety of exotic atoms, in which electrons are replaced by other particles, opens new ways to determine the details of nuclear structure. The newest exotics contain antiprotons, whose presence is manifested by the peaks in the atoms' X-ray spectrum. See p. 385. (Photo: CERN)

*This Christmas
give your friends a window on the world of science . . .*

SCIENCE NEWS will tell them what science is doing . . .
why it's important to them . . . every week.

This Christmas, share SCIENCE NEWS, your window on the world of science, with your friends. There's plenty of room for them to look in . . . to share your view of what science is doing . . . to see why it's important to them.

SCIENCE NEWS is the ideal gift for busy executives, professional men, scientists in search of an overview of all the major fields of science, science teachers, science students.

Why? Because it is planned and edited for today's man-in-a-hurry. It reports on key developments clearly . . . accurately . . . concisely—in little more than an hour's reading a week.

For someone with no more than an hour to spare, SCIENCE NEWS is a reliable summary of important

news. For the reader with more leisure, it is a guide to subjects he may want to pursue in more detail in other journals of science.

SPECIAL CHRISTMAS SAVINGS!

Your first gift subscription to SCIENCE NEWS is \$7.50. Each additional 1-year subscription is only \$6.00—and you may include your own renewal or new subscription at this money-saving rate.
