**For laboratories that
don't need an 'expensive'
top loader, yet can't use
a 'cheap' one...**

The new Sartorius 1100. Only \$425.

Why pay for an expensive balance your lab may not really need? Why buy slower and cruder equipment that doesn't meet today's standards? Sartorius solves the dilemma with its new Series 1100 top loaders—the first balances to bridge the gap between modern design and low price.

At only \$425, the Series 1100 offers many features usually found only on more expensive, sophisticated weighing instruments. For example: all-digital readout; results in less than 3 seconds; wide-range mechanical taring; fast, easy operation with no weights to handle and not even any dialing of built-in weights. It's a torsion-type balance, and the optical scale covers the entire weighing range.

Available in three different capacity/accuracy

ratios—1000g/0.1g, 200g/0.015g and 100g/0.01g—these new, reasonably priced balances are ideal for a variety of applications, from student use and research to quality control weighings.

If you're in the market for a new balance for weighing in the range from less than 100 grams up to 1500 grams, you really ought to find out more about the new Series 1100. We'll be happy to send you complete literature and our free 52-page catalog. Just write: Sartorius Division, Brinkmann Instruments, Cantiague Rd., Westbury, N.Y. 11590.
