"They laughed when I wound up my Monaco Shaver..."

That's likely to happen to you when you first use the MONACO in front of anyone. A wind-up shaver may seem a plaything. Or at best an emergency type of shaver (because it needs no cords or batteries). After all, how can a hand-cranked shaver rotate fast enough to do a clean and close job? And how many times do you have to wind the darn thing to finish one shave?

One answer at a time: The three-blade shaving head revolves at such a fast clip that it actually gives you seventy-two thousand cutting strokes a minute! Compare that to your \$30 TurboDeluxe. Now, about the winding. The palm-shaped body of the MONACO (named for its birthplace, Monte Carlo) is filled with a huge mainspring made of the same Swedish super steel used in the most expensive watch movements. You cranked the key just like a movie camera (about six turns) and the MONACO shaves and shaves and shaves. From ear to ear; from nose to neck, without slowing down. Maintains its full shaving speed right to the end—and long enough to do the complete job. Hard to believe, but really true.

A few more details: The surgical steel blades are so designed that they are continuously self-sharpening. You will find that the more you use the MONACO the sharper and the better it gets. The guard is so unbelievably thin (5/100 of a millimeter) that pressure is unnecessary. You just touch the shaver on your face and gently guide it in circular motions.

We could go on. But we don't expect to sell you with words. We just want to get you open-minded enough to tie up \$20 for two weeks. We'll give you that long to put the MONACO to the test. If it disappoints you (if you want to return it for any reason), send it back. Your money will be in the return mail. Obviously, we have reason to believe that this won't happen and that you will want to keep your MONACO for the office, club, cabin or in a permanent place in your bathroom cabinet. It's that kind of a thing. Once you've tried it you won't let it go. P.S. You not only save the cost of an electric motor, but you save the cost of repairing it. The money that it leaves in your pocket; the dependability; the good, fast, clean shaves that you'll get—they'll give you the last laugh.
