

Are you already a victim of future shock?

THE ACCELERATION started with Hiroshima. Without warning, we switched to mechanized lives, disposable goods, impermanent allegiances. We entered the plug-in, throw-away, rent-a-thing, forget-a-person age. We began using up products, ideas, people at a dizzying rate.

Some people thrive on the pace. Others are its victims. Refusing to recognize change, they collide abruptly with the future, suffering an adaptive breakdown which Alvin Toffler calls "future shock."

What's the preventative? Start with the Science Fiction Book Club. Science Fiction predicts future change long before it becomes reality: the Atomic Bomb,

the UN, computers, vision phones, organ transplants, moon landings, test tube babies... you name it. Eventually Science "Fiction" comes true! It leaps to life from the pages of some of the most provocative, stimulating, imaginative literature you can find.
