The question of whether life exists elsewhere
in the solar system may be answered by the
United States' two Viking landers to be para-
chuted down to the surface of Mars in 1976.
Or by then the Soviet Union may already have
given the world the answer. See p. 64. (Draw-
ing: NASA)

Washington, D.C. 20036

With artificial satellites already launched and space travel almost a reality, astronomy has become today's fastest growing hobby. Exploring the skies with a telescope is a relaxing diversion for father and son alike. UNITRON's handbook contains full-page illustrated articles on astronomy, observing, telescopes and accessories. It is of interest to both beginners and advanced amateurs.

CONTENTS INCLUDE:

Observing the sun, moon, planets and wonders of the sky • Constellation map • Hints for observers • Glossary of telescope terms • How to choose a telescope • Astrophotography
