The search for clues to what sets biological clocks in motion continues. The dominance of internal or external factors is still not clear, but most scientists agree that external or geophysical factors can reset the clock or throw it out of phase. See p. 178. ABOUT THE SCIENCE TALENT SEARCH

More than 9,000 students have been members of the Winners and Honors Groups in the past 30 years. Because of their standing in this oldest and most prestigious competition of its kind, they have been offered scholarships from institutions seeking quality students with proven ability in science. Many winners in the Science Talent Search are offered summer employment in scientific laboratories and other tokens of early acceptance into the world of science. Such benefits also come frequently to members of the Honors Group and to those who place in State Science Talent Searches.

ANSWERING YOUR QUESTIONS

Who May Compete? Any boy or girl who is in his last year of secondary school (public, private, parochial) in the United States but excluding U.S. possessions, who is expected by the certifying school official to complete college entrance qualifications before October 1, 1972, and who has not competed in any previous Science Talent Search is eligible to enter this competition.

How Can Students Compete? Teachers or other school officials should request entry materials for the outstanding science and mathematics students of the school.

What Is A Completed Entry? A project report of about 1,000 words which presents evidence of research ability in science; a Personal Data Blank filled in by student, teachers and principal; national test scores and high school transcript.

Judging is based primarily on the student's report on an independent research project in the physical sciences, engineering, mathematics, biological sciences (excluding live vertebrate experimentation), or behavioral sciences.

What Is The Deadline? Midnight, December 15, 1971.
