

## THE ROOTS OF CIVILIZATION:

Did early man have a system of notation?

# what on [in] earth!

**A new theory called plate tectonics is revolutionizing our understanding of the planet we call home.**

**It provides the first adequate explanation of the mountains that have awed man for centuries . . . and the volcanos and earthquakes that have filled him with terror.**

**We of the CIBA-GEIGY Corporation family are proud to present this great advance in fundamental scientific knowledge, from the very frontiers of geological research in:**

Seemingly haphazard marks on a 32,000-year-old Ice Age bone convinced Alexander Marshack that man had a system of notation 25,000 years before the first hieroglyphic sign. The theory is explained in a book to be published next week. Scientists comment on its possible meaning. See p. 124. (Photo: © 1971, Alexander Marshack)
