

Don't Miss This One!

Be sure to read the great news for science teachers in the Bausch & Lomb advertisement on page206.....

Plan to see and try out for yourself the exciting new Made in U.S.A. Academic StereoZoom Series at any of these convention exhibits:

National Catholic Educational Association, Philadelphia, April 4-6;

National Science Teachers Association, New York City, April 7-14;

Department of Elementary School Principals, Miami, April 8-13;

Federation of American Societies for Experimental Biology, Atlantic City, April 10-14;

National Association of Biology Teachers, San Francisco, October 26-28.

Get Bausch & Lomb catalog 31-2395 and check the prices against those of any competitive models, foreign or domestic.

A bulletin describes and illustrates three special science kits designed to stimulate young students in the elementary and junior high school grades. The bulletin includes a general description of each kit and an item-by-item list of the contents of each. Each of the three kits—Nature Study, Basic Science and Primary Science—contains apparatus, materials and appropriate laboratory manuals for a wide variety of experiments. *Stansi Scientific.*

Arm balance features a relocation of the graduated scale from vertical to an incline of 30° to permit direct viewing from a seated or standing position. The unit's square precision-formed aluminum pans have flat bottoms and retaining edges to prevent accidental loss of items being weighed. Other features include a totally new suspension system employing a secondary knife edge to enhance balance performance, a more rugged main beam, and a new hangar that greatly reduces friction potential. *Damon Corp.*

Environmental wall charts are compiled by experts and illustrated in full color by an outstanding artist. Available are the Air Pollution Chart (28" x 22½"), Water Pollution Chart (28" x 22½") and the Oceanography Chart (39" x 29"), all are magnificent visual aids, with the latest authoritative facts and figures, condensed to essential details. *Roy G. Scarfo Inc.*

Paper shredder destroys continuous forms without supervision. Simply turn on the electrically powered shredder, insert the lead sheet, the unit does the rest quickly, quietly and efficiently. This machine also shreds confidential documents, obsolete records, ledger sheets, blueprints, plans, bids, anything of a secretive nature made of paper. *Shredmaster Corp.*

Plant growth bench is used in research, teaching, testing or environmental studies where continuous growth in large quantity or variety is required. The unit features a large growth area, 48 square feet, is easily installed, and requires only electrical and plumbing connections. Controlled conditions are featured with programmed lighting up to 2,500 f-c (25,000 lux), 18°C. to 30°C., control ± 0.5°C., and "uni-floor" provides uniform upward air flow around each plant. Humidification is optional. *Controlled Environments, Inc.*

Mechanical weather station is a self-contained, durable, easy to install meteorological recording system which measures wind direction and speed, temperature, humidity, and as an option, rainfall. The instrument's applications include general field studies, air pollution, engineering and architectural design studies, power plant monitoring, transmission-line icing studies and highway and airport safety programs. *Meteorology Research Inc.*
Circle No. 100 on Reader Service Card

Locator beacon for aircraft is now being used to help speed up search and rescue operations in plane accidents. The device is battery-powered, and it is a self-contained crash-proof unit that automatically sends out signals from a downed aircraft, regardless of the pilot's condition. *Aero Electronics Inc.*
