

Thousands
of
SCIENCE
PROJECTS

IT'S SCIENCE FAIR TIME

Do you need inspiration for a science exhibit? Do you want a suggestion for a project?

THOUSANDS OF SCIENCE PROJECTS is a collection of the answers given to these questions by thousands of boys and girls who participated in fairs leading to the International Science and Engineering Fair, or who competed in the Westinghouse Science Talent Search.

Each title represents a project completed by at least one student. Some projects are so basic that they have been done by thousands of young people. Some are largely original.

The titles have been classified by subject matter using the Library of Congress classification system so you can more easily find out what you want.

A ready source of ideas for students at all age levels.

PRICE: \$1.00 each postpaid.

books OF THE WEEK

Books of the Week is an editorial service for readers' information. To order any book listed, or any U.S. book in print, please remit retail price, plus 25¢ handling charge for each book to Book Order Service, Science News, 1719 N St., N.W., Washington, D.C. 20036. All books sent postpaid.

THE AIR WAR IN INDOCHINA—Raphael Littauer and Norman Uphoff, Eds., Air War Study Group, Cornell U.; preface by Neil Sheehan—Beacon Press, 1972, rev. ed., 289 p., maps, tables, paper, \$3.95. A multidisciplinary study and assessment of the uses and consequences of the bombardment of Vietnam, Laos and Cambodia sustained over seven years from 1965 to the end of 1971.

ANALOG AND DIGITAL ELECTRONICS FOR SCIENTISTS—Basil H. Vassos and Galen W. Ewing—Wiley-Interscience, 1972, 405 p., diagrams, \$12.95. Specifically written for the scientist, emphasizing the use rather than the design of circuits. A valuable self-study guide for professionals in chemistry, physics, the life sciences and medicine.

ANIMISM, MAGIC AND THE DIVINE KING—Géza Róheim—Int'l Univs. Press, 1972, 390 p., \$12. Reissue of 1930 study of animism and its place in anthropology, applies the theories of psychoanalysis to probing the primitive mind, its working and development, analyzing the role of psychology in magic, the medicine man, the divine king, and the scapegoat.

THE BABOON—Richard Gardner—Macmillan, 1972, 152 p., photographs, map, \$4.95. Identifies the different subgenera—savanna baboon, drill, mandrill, hamadryas, gelada—and describes habitat and habits, characteristics of troop behavior and of individual.

BASIC COLOR TELEVISION COURSE—Stan Prentiss—TAB Bks., 1972, 420 p., photographs, diagrams, \$9.95; paper, \$6.95. Gives background in TV receiver basics, both color and black and white, covering the field from antenna to picture and sound.

GEOCHEMICAL ENVIRONMENT IN RELATION TO HEALTH AND DISEASE—Howard C. Hopps and Helen L. Cannon, Eds.—N.Y. Acad. of Sciences, Annals, Vol. 199, 1972, 352 p., illus., paper, \$25. Papers address themselves to the distribution and availability of trace elements to plants and to animals, the problems of sampling and analysis, the geochemical environment in relation to health, cardiovascular diseases and cancer, and determination of causal relationships.

LANDSCAPE FOR LIVING: The Yearbook of Agriculture, 1972—Jack Hayes, Ed.—USDA (GPO), 1972, 412 p., 32 color plates, 175 photographs, drawings, \$3.50. Fact-filled with professional advice for the home gardener concerned with improving the environment with plants in garden, neighborhood, park and school.

THE LIFE OF THE FAR NORTH—William A. Fuller and John C. Holmes—McGraw-Hill, 1972, 232 p., photographs in color, drawings, \$4.95. The book deals with the ecology and natural history of the taiga and tundra, life in the boreal woodlands and the treeless arctic plains.

LISTEN TO THE WILD—Susanne Hart—Taplinger, 1972, 222 p., 24 plates, \$7.50. African adventures of a woman veterinarian; well illustrated, informative reading about wild animal patients in their natural environment.

MALNUTRITION: Its Causation and Control (with special reference to protein calorie malnutrition), Vols. 1 and 2—John R. K. Robson with Frances A. Larkin and others—Gordon & Breach, 1972, 311 p., 302 p., illus., \$14.95 each; \$24.50 per set. Vol. 1 treats global nutrition problems, the ecology and etiology of malnutrition, and normal nutrition. Vol. 2, nutrient requirements, nutrition programs and services, food habits and methodology of change.

THE MATURE SOCIETY—Dennis Gabor—Praeger, 1972, 208 p., diagrams, \$7.50. Nobel Prize winner (for his invention of holography) here considers what he calls the present crisis of consumer saturation and the destructive capacity of technology, and sketches a future in which EQ (Ethical Quotient) may be as important to human progress as IQ.

A POSSIBLE REALITY: A Design for the Attainment of High Academic Achievement for Inner-City Students—Kenneth B. Clark with staff of MARC (Metropolitan Applied Research Center)—Emerson Hall (D. White), 1972, 176 p., \$6.95. Deals with the rationale of school failure and teacher expectations and presents step-by-step an experimental program aimed at bringing elementary students to grade level norms within one year.

THE PROCESSION OF LIFE—Alfred S. Romer—Doubleday, 1972, 384 p., 28 plates, drawings, paper, \$2.95. Drawing his evidence from clues of the fossil record, from embryology and related sources, the author traces the evolution of the major families of animals from single-celled organisms to Cro-Magnon man. Reprint (1968).

STRATIGRAPHIC OIL AND GAS FIELDS: Classification, Exploration Methods and Case Histories—Robert E. King, Ed.—Am. Assn. of Petroleum Geologists, 1972, 687 p., illus., \$30. Subjects covered range from geologic methods for locating stratigraphic traps, and stratigraphic trap exploration, to the use of gravity, magnetic and electrical methods.

TEACHING SCIENCE IN AN OUTDOOR ENVIRONMENT—Phyllis Gross and Esther P. Railton—U. of Calif. Press, 1972, 188 p., plates, drawings, paper, \$2.95. A handbook for students, teachers and camp leaders, describes activities for learning science in the field, correlation with other curriculum areas, and development of long-term projects.

THE TOMB OF TUTANKHAMEN—Howard Carter—Dutton, 1972, 238 p., 17 color plates, 65 photographs, \$12.95; \$10.95 until 12/31/72. The story of the discovery of this landmark find in archeological history, first published in installments between 1923 and 1933, told by the man who led the excavations, illustrated here both with contemporary black and white and recent color photographs.

UNDERSTANDING AND USING RADIO COMMUNICATIONS RECEIVERS—John Schultz—TAB Bks., 1972, 192 p., illus., \$7.95; paper, \$3.95. Uses semi-technical approach to help reader choose equipment best suited to his needs, and to obtain the best possible performance from it.
