**Metal/mineral detector catalogue** fully describes the "world's largest and finest line of metal and metal detectors." Everything a treasure hunter or professional prospector needs to know about using such equipment, the art of electronic search, how-to-do-it tips and where to get more information are covered in this comprehensive digest of facts. Included are fully illustrated descriptions of mineral and metal detectors of many ranges.

*White's Electronics*

**Dangerous drugs chart** is an innovative wall unit designed to involve today's students. It gives them an instant input of over 1,000 facts to facilitate personal decision-making. Students get numerical data—not mere statements. The risks of abuse of 26 drugs are rated on a unique scale, and symptoms of use and withdrawal are noted. This feature enables classes to discover at a glance the relevant points about today's drug picture. Pressure-sensitive stick-on numbers and symbols are supplied as a convenient way to change ratings in the years ahead with further lab research and government rulings. This chart is recommended for all age groups—from elementary grades to young adults, faculty counselors, parent groups, libraries, laboratories and medical facilities.

**English-metric conversion calculator** is the first functional educational aid available to assist educators in teaching the metric system. It will allow persons to orient themselves quickly in the principles, applications and calculations involved. An open window display on the faces of the calculator allows visual comparison of the customary units of measurement directly to metric units.

**Vibration-free "table top" isolation work station** is ideal in areas where space is at a premium and the requirements for precision in industrial, scientific and medical work call for a vibration-free work surface. The work station is compact, easy to maintain, chemically resistant and provides up to 90% isolation from typical building vibration. Yet it is low in price.

**Water flow monitor** can prevent costly damage resulting in laboratory floods. The monitor is connected between the

water-cooled equipment and the drain. If the water flowing through the monitor to the drain ceases for any reason, the unit will shut off electrical power to the water-cooled equipment. Simultaneously, it will turn off a solenoid valve placed in the water supply line, thereby preventing water spillage. Its use enables the scientist to leave water-cooled equipment running safely overnight.

*Instruments for Research & Industry*  
Circle No. 99 on Reader Service Card

**Ecology collection kit** packs comprehensive selection of apparatus in a rugged duffel bag. The kit provides the complete range of equipment required for collecting marine and fresh-water specimens conveniently and efficiently, so that the collector, instructor, or student can tote himself or throw into a car. Included in the kit are a 20-foot fine-mesh seine, a heavy-duty general-purpose water dip net, plankton tow net, a visibility disk, 16 jars, a rust-proof brass sieve for sand and mud, and many other items.

*CCM General Biological Inc.*

Circle No. 159 on Reader Service Card

**Learning system** for individualized instruction in biology is intended primarily for first-year students but is also useful for review with second-year students at high school and college freshmen level. It is a self-contained multimedia system utilizing filmstrips and tapes, and employs active participation by the student. No unusual equipment is required, and the system clearly defines learning objectives. Emphasis is on behavioral objectives—not on memorizing details of marginal importance. The system is designed to secure almost total involvement. It requires little or no assistance by the teacher.
