Addicted doctors

The conclusion drawn from the Lipp-Benson study on marijuana use among physicians (SN: 11/18/72, p. 322) is very puzzling in view of older information on the physician-addict and recent action by the American Medical Association.

As Meyers, Jawetz and Goldfien point out (*Review of Medical Pharmacology*, Los Altos, Calif.: Lange Medical Publications, 1970-2nd edition, p. 247) meperidine also known as Demerol has been the addictive drug which doctors and nurses are most likely to misuse. Meperidine unlike marijuana is a narcotic analgesic of intermediate potency. Its use among medical personnel proliferated because of early unsubstantiated claims and availability factors.

The American Medical Association recently voted to take strong action to protect the public against a significant problem of drug addiction, alcoholism and mental disorders among physicians. AMA recommendations could lead to the loss of medical licenses by such sick doctors.

In evaluating both marijuana and meperidine use among physicians, I can only conclude that possession of an M.D. does not guarantee wise personal drug use.

Science and social policy

"Social science, social policy and 'unfounded generalizations'" (SN: 11/25/72,

p. 343) demonstrates the inability of social scientists to draw reasonable conclusions. Statistical significance, theoretical importance, practical importance and importance to social policy are separate considerations, yet each can be derived from relevant data.

Few things are exactly the same, so one ought to be able to show *some* difference in intelligence between blacks and whites. Such a difference will be statistically significant if the sample size is large enough. But the difference is clearly small compared to the total variation of intelligence in our society, and intelligence is only one aspect of capability. Social policy today does not favor eugenics, but if it did, there are a thousand and one obvious bases for its practice and more fruitful factors for research!

Busing has been defined as a constitutional requirement, even if useless. *All* research shows that busing has not been a panacea and that *more* must be done to provide equality of opportunity.

While a moratorium on certain scientific research is negative, psychological and monetary incentives for relevant research are desirable. Such incentives should emphasize that:

- * Human behavior is seldom based on one or two critical factors (if it is, we haven't found them).
- * Solutions to major social problems require major efforts (not the hiring of an occasional bus driver).
- * Since such major efforts are costly (in human and monetary resources) social experimentation should be done on the basis of small-scale intensive projects.
- * Since any major social program would be expensive, one practical aspect of social experimentation must include maximization of cost-effectiveness.

PUZZLES FOR PLEASURE

A new collection of brain-challenging puzzles to exercise your mind and help you to reason logically by E. R. Emmet. Each puzzle provides fun and entertainment while it stimulates and challenges you. A fresh sense of achievement comes with each puzzle you solve as you develop your imagination, insight and logic.

Some are easy, some hard and others "impossible". Colorful characters in picturesque settings add to the fun. No specialized knowledge of math required.

Arranged in order of difficulty with solutions and complete explanations given. Illustrated

Order Now only \$6.95, plus 30¢ handling.

10-day Money-Back Guarantee

MATH WITHOUT TEARS

In lively non-technical language Mr. Hartkopf gives you a basic understanding of many of the everyday applications of mathematics.

Emphasizing the practical aspects of math, the author avoids mathematical terms and jargon and takes the reader from simple counting to trigonometry and calculus.

MATH WITHOUT TEARS is written with a light touch and is filled with interesting anecdotes, spiced with humor.

Learn math in the comfort of

your own home at minimum cost. ORDER NOW:

SCIENCE SERVICE

Institution for the Popularization of Science founded 1921; a nonprofit corporation

Board of Trustees—Nominated by the AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE: Bowen C. Dees, The Franklin Institute; Athelstan Spilhaus, Woodrow Wilson International Center for Scholars; Deborah Partridge Wolfe, Queens College. Nominated by the NATIONAL ACADEMY OF SCIENCES: Gerald F. Tape, Associated Universities; Allen V. Astin, National Bureau of Standards; Frederick Seitz, Rockefeller University. Nominated by the NATIONAL RESEARCH COUNCIL: Gerald Holton, Harvard University; Jacob Rabinow, National Bureau of Standards; Glenn T. Seaborg (President), University of California at Berkeley. Nominated by the JOURNALISTIC PROFESSION: Norman Cousins, "World"; Julius Duscha, Washington Journalism Center; O. W. Riegel (Secretary), Washington and Lee University. Nominated by the E. W. SCRIPPS TRUST: Milton Harris (Treasurer), Washington, D.C.; Edward W. Scripps II (Vice President and Chairman of the Executive Committee), Edward W. Scripps Trust; John Troan, Pittsburgh Press.

Director: E. G. Sherburne Jr.; Assistant Director: Dorothy Schriver; Business Manager: Donald R. Harless; Staff: Things of Science: Ruby Yoshioka.
