

**NOW...
A wholly
different concept
for teaching
with the microscope**

It looks different. It is different. It's totally designed for science teaching. Academic StereoZoom Microscope by Bausch & Lomb lets science students relate to the specimen being studied without having to take a course in microscopy first.

This unique Bausch & Lomb microscope combines stereovision with an exclusive zoom magnification that makes for a natural relationship between the student and the specimen. Scanning the field at low magnification or zooming to a specific detail at higher magnification is as non-technical as watching a quarterback on TV. And list prices for this American-made instrument start at \$144.

There is no longer an illumination problem. The turn of a knob allows selection of reflected light, transmitted light or a combination of the two, and it uses just one light bulb!

These new instruments are well built, with every safeguard to prevent damage to assure long, maintenance-free, lifetime use.

You have a need to know what's new. Write for the new catalog 31-2395 and our free demonstration offer, today.
