

I GOT MY IDEA FROM A THINGS of science UNIT

It's science fair time again.....

—A THINGS of science unit may be just the thing to get you started on your project. A THINGS of science unit won't make a science fair project, but it can give you ideas and get you on the way.

THINGS of science are designed for young people 10 to 16. The kits contain an explanatory booklet and simple materials for easy-to-do experiments that make science a "fun activity."

Normally obtained on a subscription basis, units are now being offered at \$1.00 each or three for \$2.50 while the supply lasts. To obtain the units, please send your order and remittance to:
