

Science[®] News

A Science Service Publication
Vol. 105/March 30, 1974/No. 13
Incorporating Science News Letter

Of the Week

Mercury at last	204
Oldest lunar rock	205
Slingshot to Saturn	205
Subsea wellheads	205
Energy vs. environment	206
Quark theory disintegrating	207

Research Notes

Behavior	208
Oceanography	208
Astronomy	209
Environment	209

Articles

Culturing blood cells	210
Electricity from trash	212

Departments

Books	202
Letters	203
Off the Beat: Obfuscation	214

Cover: Trash piles up and up on the curbs and in the alleys of the nation. America, the least frugal of nations, makes more garbage than most. Yet under the crud is a source of energy. The combustibles in trash can be burned to make electricity. A project in St. Louis is the first large-scale attempt to do it. See p. 212.

Publisher	E. G. Sherburne Jr.
Editor	Kendrick Frazier
Senior Editor and Physical Sciences	Dietrick E. Thomsen
Senior Editor and Behavioral Sciences	Robert J. Trotter
Biological Sciences	Joan Arehart-Treichel
Science and Society	John H. Douglas
Space Sciences	Jonathan Eberhart
Writer/Copy Editor	Lisa J. Shawver
Design/Production	Dale Appleman
Assistant to the Editor	Esther Gilgoff
Books	Margit Friedrich
Advertising	Scherago Associates, Inc. 11 W. 42nd St. New York, N.Y. 10036 Fred W. Dieffenbach Sales Director

To the Editor

Dinosaur distortions

Lovers of vertebrate fossils, in general, and students of the dinosaurs, in particular, are enthusiastically attempting to remove my hide. Before they are successful in nailing it (my hide) to the barn door, we should correct several inaccuracies in your article about our dinosaur find (SN: 3/9/74, p. 159).

Tyrannosaurus rex, *Allosaurus*, and *Triceratops* should never be referred to in the same breath without qualification. The fossil remains of *Allosaurus* and *Stokesosaurus* are separated from those of *Tyrannosaurus* and *Triceratops* by approximately 50 million years and thousands of feet of sediment. *Stokesosaurus* does appear to be the first new genus of dinosaur from the Morrison Formation of Utah in about 75 years, but most assuredly not the first new dinosaur described in 75 years.

The Morrison Formation contains the largest dinosaur graveyards in the United States, but, alas, the Cleveland-Lloyd Quarry is not the largest.

Stokesosaurus is not necessarily a close relative of *Tyrannosaurus*; it is inferred, instead, that the median vertical ridge on the ilium is a character similar to one noted on the homologous element of some tyrannosaurs (dinosaurs, including *Tyrannosaurus*, of the Family Tyrannosauridae). It would be foolish for us to infer a close relationship with other dinosaurs at this time. That must wait until more original material can be definitely assigned to the new "type"—we still know very little about this interesting dinosaur, even though certain broad interpretations are reasonable and defensible.

James H. Madsen, Jr.
Assistant Research Professor
The University of Utah
Salt Lake City, Utah

(We regret the errors—Ed.)

Double double, Shakespeare trouble

Your article on fossil fuels (SN: 2/2/74, p. 77) contains a horrible mistake. You not only misquote Shakespeare from Macbeth but also attribute the quote to the wrong character.

The original quote is said by Macbeth (Act I; Scene VII; line 1) "If it were done when 'tis done, then 'twere well it were done quickly."

I would advise you to stick to science and forget about literature.

Alan Lichtenstein
New York, N.Y.

(Sorry! Its 20 years since we played in Macbeth. We won't forget about literature, but from now on we will check our memories. Was reader Lichtenstein the only one who noticed?—Ed.)

Life-scripting by names

In his latest book *What Do You Say After You Say Hello?* Eric Berne made some very interesting explanatory comments on how people get life-scripted by the names they are given (see especially pages 77-79). This matter is of great importance to people who have such names, and to those who meet them. Berne refers to two neurologists, H. Head and W. R. Brain, and I will add a psychiatrist at Stanford, William C. Dement, and the Director of the San Bernardino County Air Pollution District, John Fairweather. Joe Herring works for Louisiana Fish and Game Department, Harvey Duck is boating editor for Chicago Daily News, Jim Crowe is outdoor editor for Detroit News, Pat Snookfield editor for Argosy, Lathan Moose is North Carolina Wildlife Commissioner and has a Dennis Eagle working for him, Junior Beaver once worked for Illinois Wildlife Federation and Fred Bear was a famous archer.

I hope you will publish this in "To the Editor" because so far all the "name game" letters that I have seen have been amusement oriented as if only chance were involved.

Leonard L. Lewis
Berkeley, Calif.

With regard to "It's All in the Name," I had a philosophy of science course with a Dr. Wisdom in my student days at Temple University, and never doubted whether someone with such a name could be anything but a philosopher.

Mrs. Albert E. Meier
Philadelphia, Pa.
