# AUTHORS

your book should be published now

If your manuscript contains knowledge or observations that should be shared with others, we want to publish it. Your book will get professional editing, first-rate design and production, plus expert promotion and distribution. You are invited to send your fiction, nonfiction or poetry manuscript for prompt review and terms of publication, or you may ask for our free *Authors' Guide to Publication*.

**METER-LITER-GRAM-**

game  
teaches  
metric  
\$9.00 each

**METRIC EDUCATIONAL GAME**

MR. METRIC'S Game teaches the metric measurement system to children and adults. This game, designed for teaching or learning the metric system, employs sound learning principles of seeing, hearing and feeling - explanation, repetition, and recall, with the stimulation of competition...

Two - ten persons, age 8 to adult, can play the game at one time. The game board is laid out in metric units, game tokens are cubic centimeters, and the players move across the game board as they respond to metric questions on metric units, symbols, terminology, unit relationship, and metric math... ideal for schools, industry, or the home for the family.

# NEW! 3-CHANNEL COLOR ORGAN KIT!

Low Cost . . . Easy to Build . . .  
No Technical Knowledge Needed

Now you can easily build a terrific 3-Channel Color Organ. Your completed unit has 3 bands of audio frequencies to modulate 3 independent strings of colored lamps—that is: "lows" as reds, "middles" as greens, "highs" as blues. Just connect your hi-fi, power amplifier, radio, etc. and plug each string of lamps into its own channel (max. 300w each). Kit features 3 neon indicators, 3 color intensity con-

trols, 3 controlled individual SCR circuits, protective isolation transformer, custom plastic housing & complete instructions.

# Globe trotting

SCIENCE NEWS' peripatetic staff of Washington-based science writers roam far and wide to bring our readers the most accurate, up-to-date, authoritative scientific news possible. From interviews at large university laboratories to visits to out-of-the-way ecological field sites, from multi-hotel meetings in major metropolises to single-subject symposiums in small college towns, our reporters go where the science news is. They are your witness to the world of science, whether it be a historic flyby of a distant planet or a biological specimen under a new kind of electron microscope.

port on and gather news from: NIH, AEC, NSF, NRC, NAS, NAE, NOAA, NASA, USGS, HEW, FDA, NBS, EPA, CEQ, FEO, OTA. To say nothing of the science committees of Congress and the science pronouncements of the White House, just six blocks from the office of SCIENCE NEWS.

When they have some time at their desks, SCIENCE NEWS reporters have rich lodes of research results at their fingertips. We regularly receive some 300 scientific journals from around the world.

Whenever there's a source to be consulted or fact to be checked, we never hesitate to reach for the long-distance telephone.

## science □ news

The point is that we go out of our way to obtain the most authoritative and most timely science news possible. We think that's what you want . . . and deserve.

We figure that during the past 18 months, they have traveled the equivalent of six trips around the world in their efforts to keep SCIENCE NEWS readers well informed.

When they're back in Washington, they find plenty to keep them busy there. Washington is the richest source of science news in the United States. There's a whole acronymic alphabet full of science-based agencies to re-
